ABOUT

At Baranska Design we pride ourselves on being one of the most technologically advanced manufacturers of handmade glass in Europe. Our designer, Edyta Baranska has spent almost 25 years working with glass, she specialises in the technique of fusing glass. We have developed a wide variety of products to cater for different tastes and all using high quality fused glass. We have the ability to produce in limited or long series; glass tables, mirrors, lamps and accessories, as well as glass wall partitions and other interior objects for hotels, restaurants, bars and the home. We

also provide interior glass services for office and retail environments. Our professional in-house team design has a deep understanding of international interior trends and fashions, and we use this knowledge to create designs that match all seasons. Highly finished, the technical advances used to realise our unique collection of fused glass furniture and accessories provides a new level of sophistication for lovers of designer furniture everywhere.

THE DUBAI MALL – BIRDS INSTALLATION

A large-scale installation beneath the glass dome of The District at The Dubai Mall, composed of hundreds of fused-glass birds in four sizes. Suspended 13–14 metres above the ground, the elements form a light, irregular cloud that subtly moves with the airflow and interacts with the changing light.

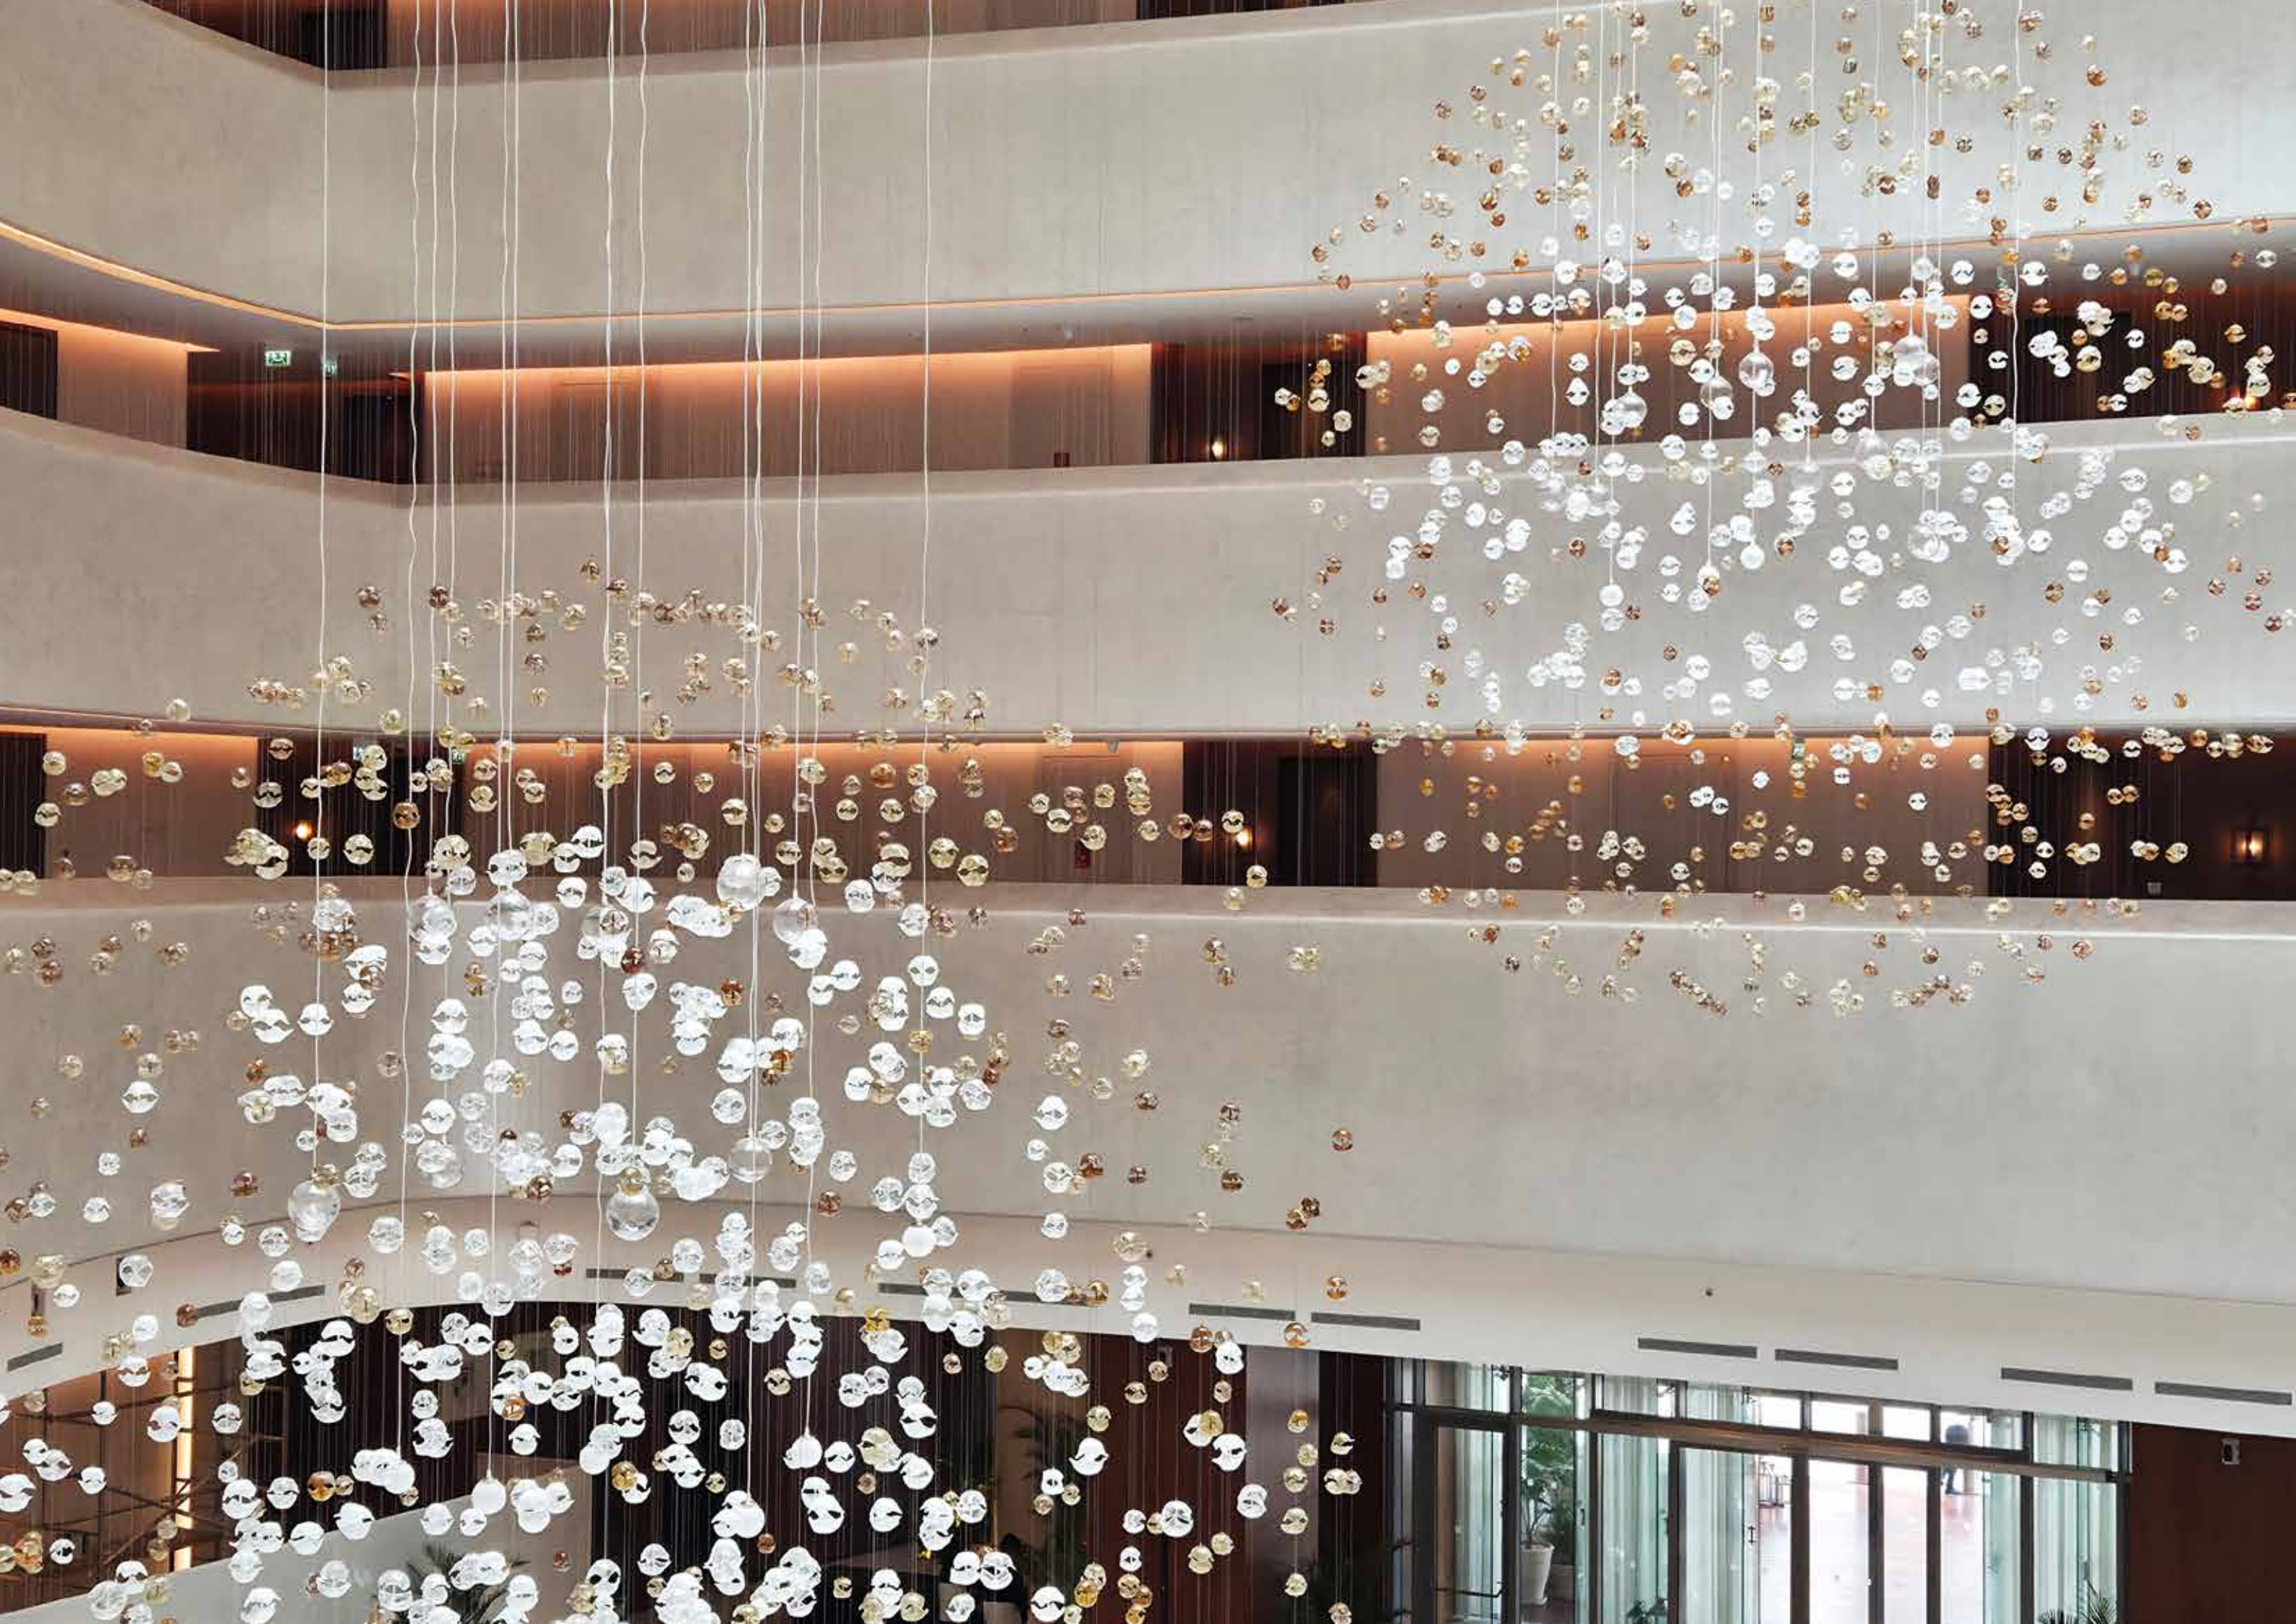

THE BRICK HOTEL GDANSK – WAVE INSTALLATION

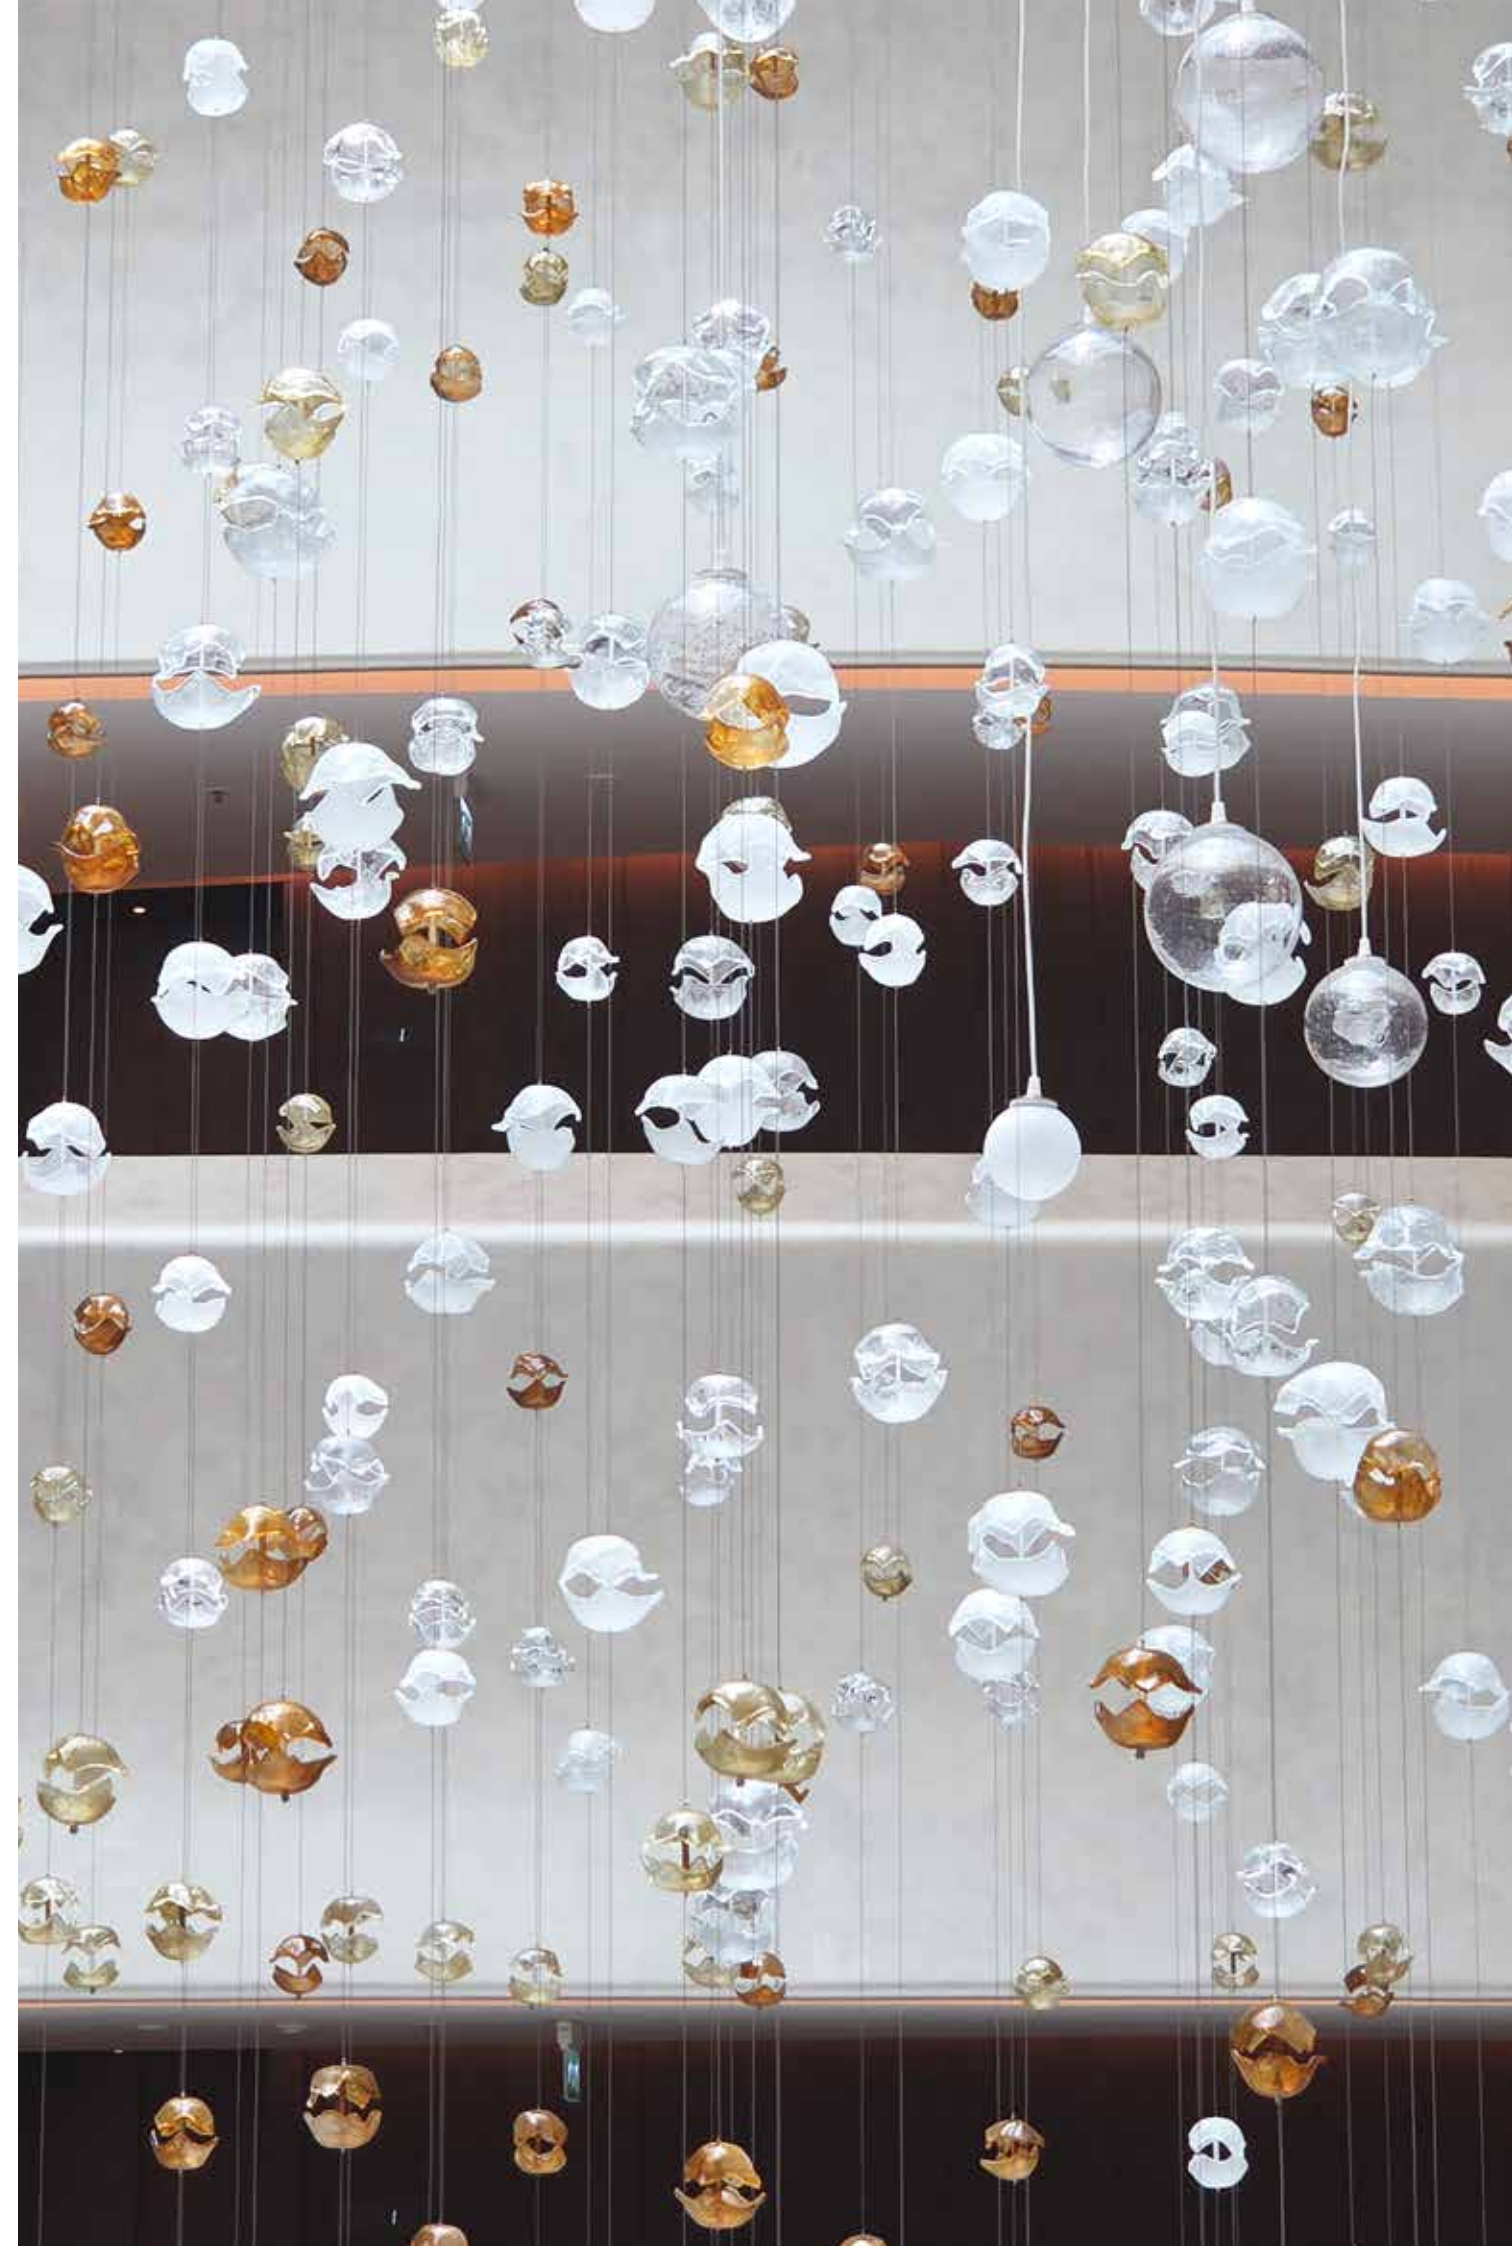

A sculptural glass installation composed of suspended glass sheets forming a flowing, ribbon-like wave. The layered structure creates a sense of movement and lightness, subtly interacting with the surrounding interior.

THE ABU DHABI EDITION - SEA FLOWERS

A monumental installation composed of three suspended spheres, each five metres in diameter. Thousands of handcrafted Sea Flowers glass elements in shades of gold and amber form the sculptural structures, suspended within the hotel's 26-metre-high atrium.

ALLCON DEVELOPER

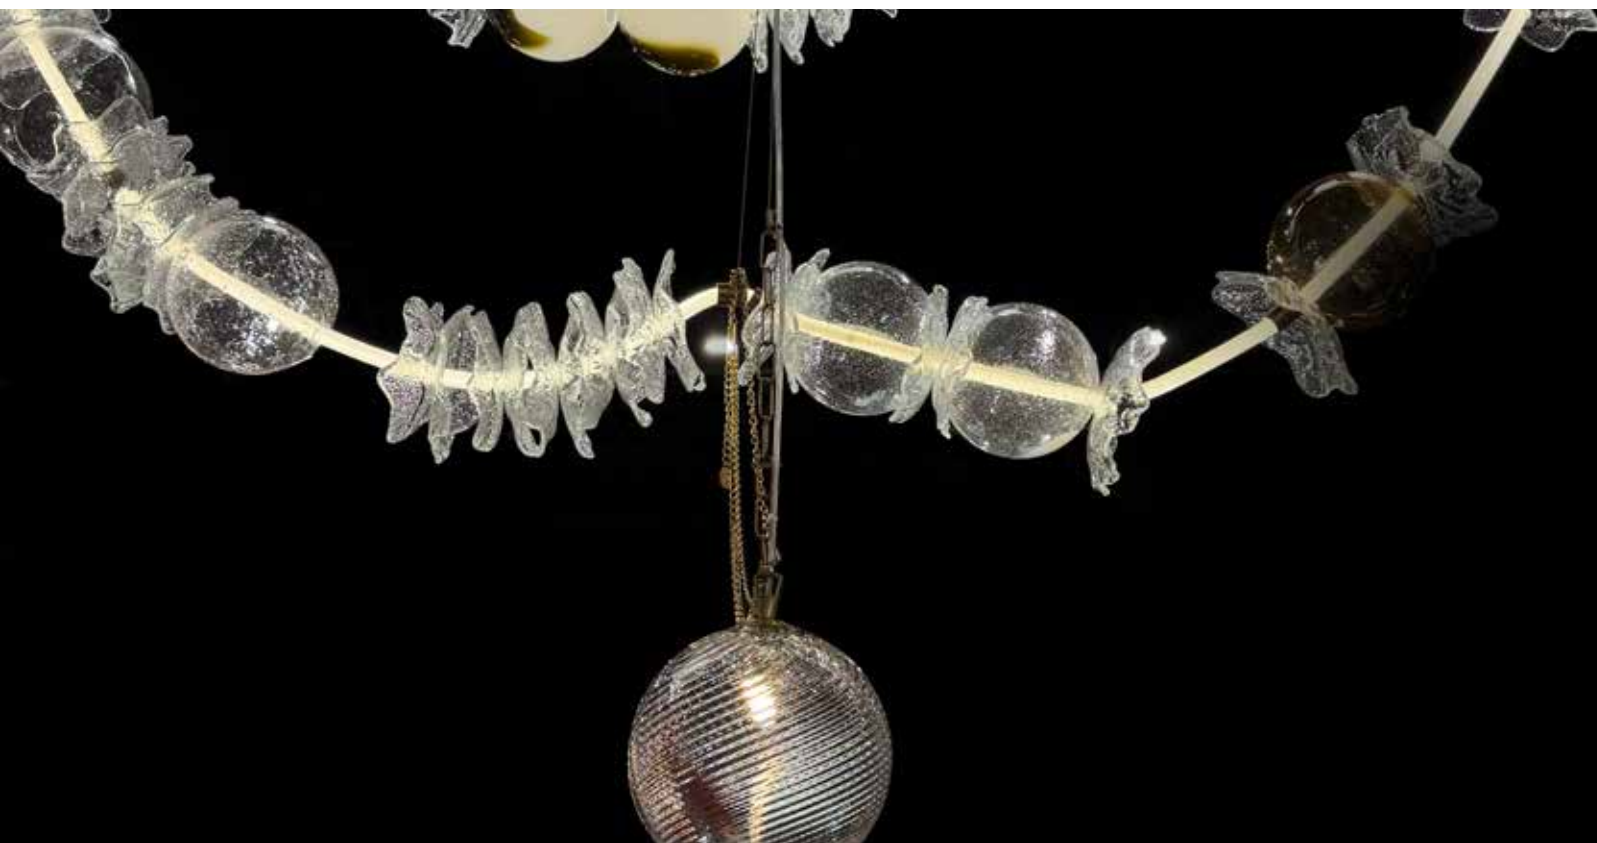

A sculptural glass installation inspired by the Baltic coast, natural amber and the movement of sea waves. Suspended glass elements interact with light and perspective, creating a fluid composition designed for the lobby of Allcon's building in Gdansk.

BIJOU

Inspired by the elegance and delicacy of jewellery, Bijou transforms the idea of personal adornment into a sculptural lighting piece. Composed of hand-formed artistic glass elements, it was conceived as jewellery for the interior.

PRIVATE APARTMENT - FALLING STONES

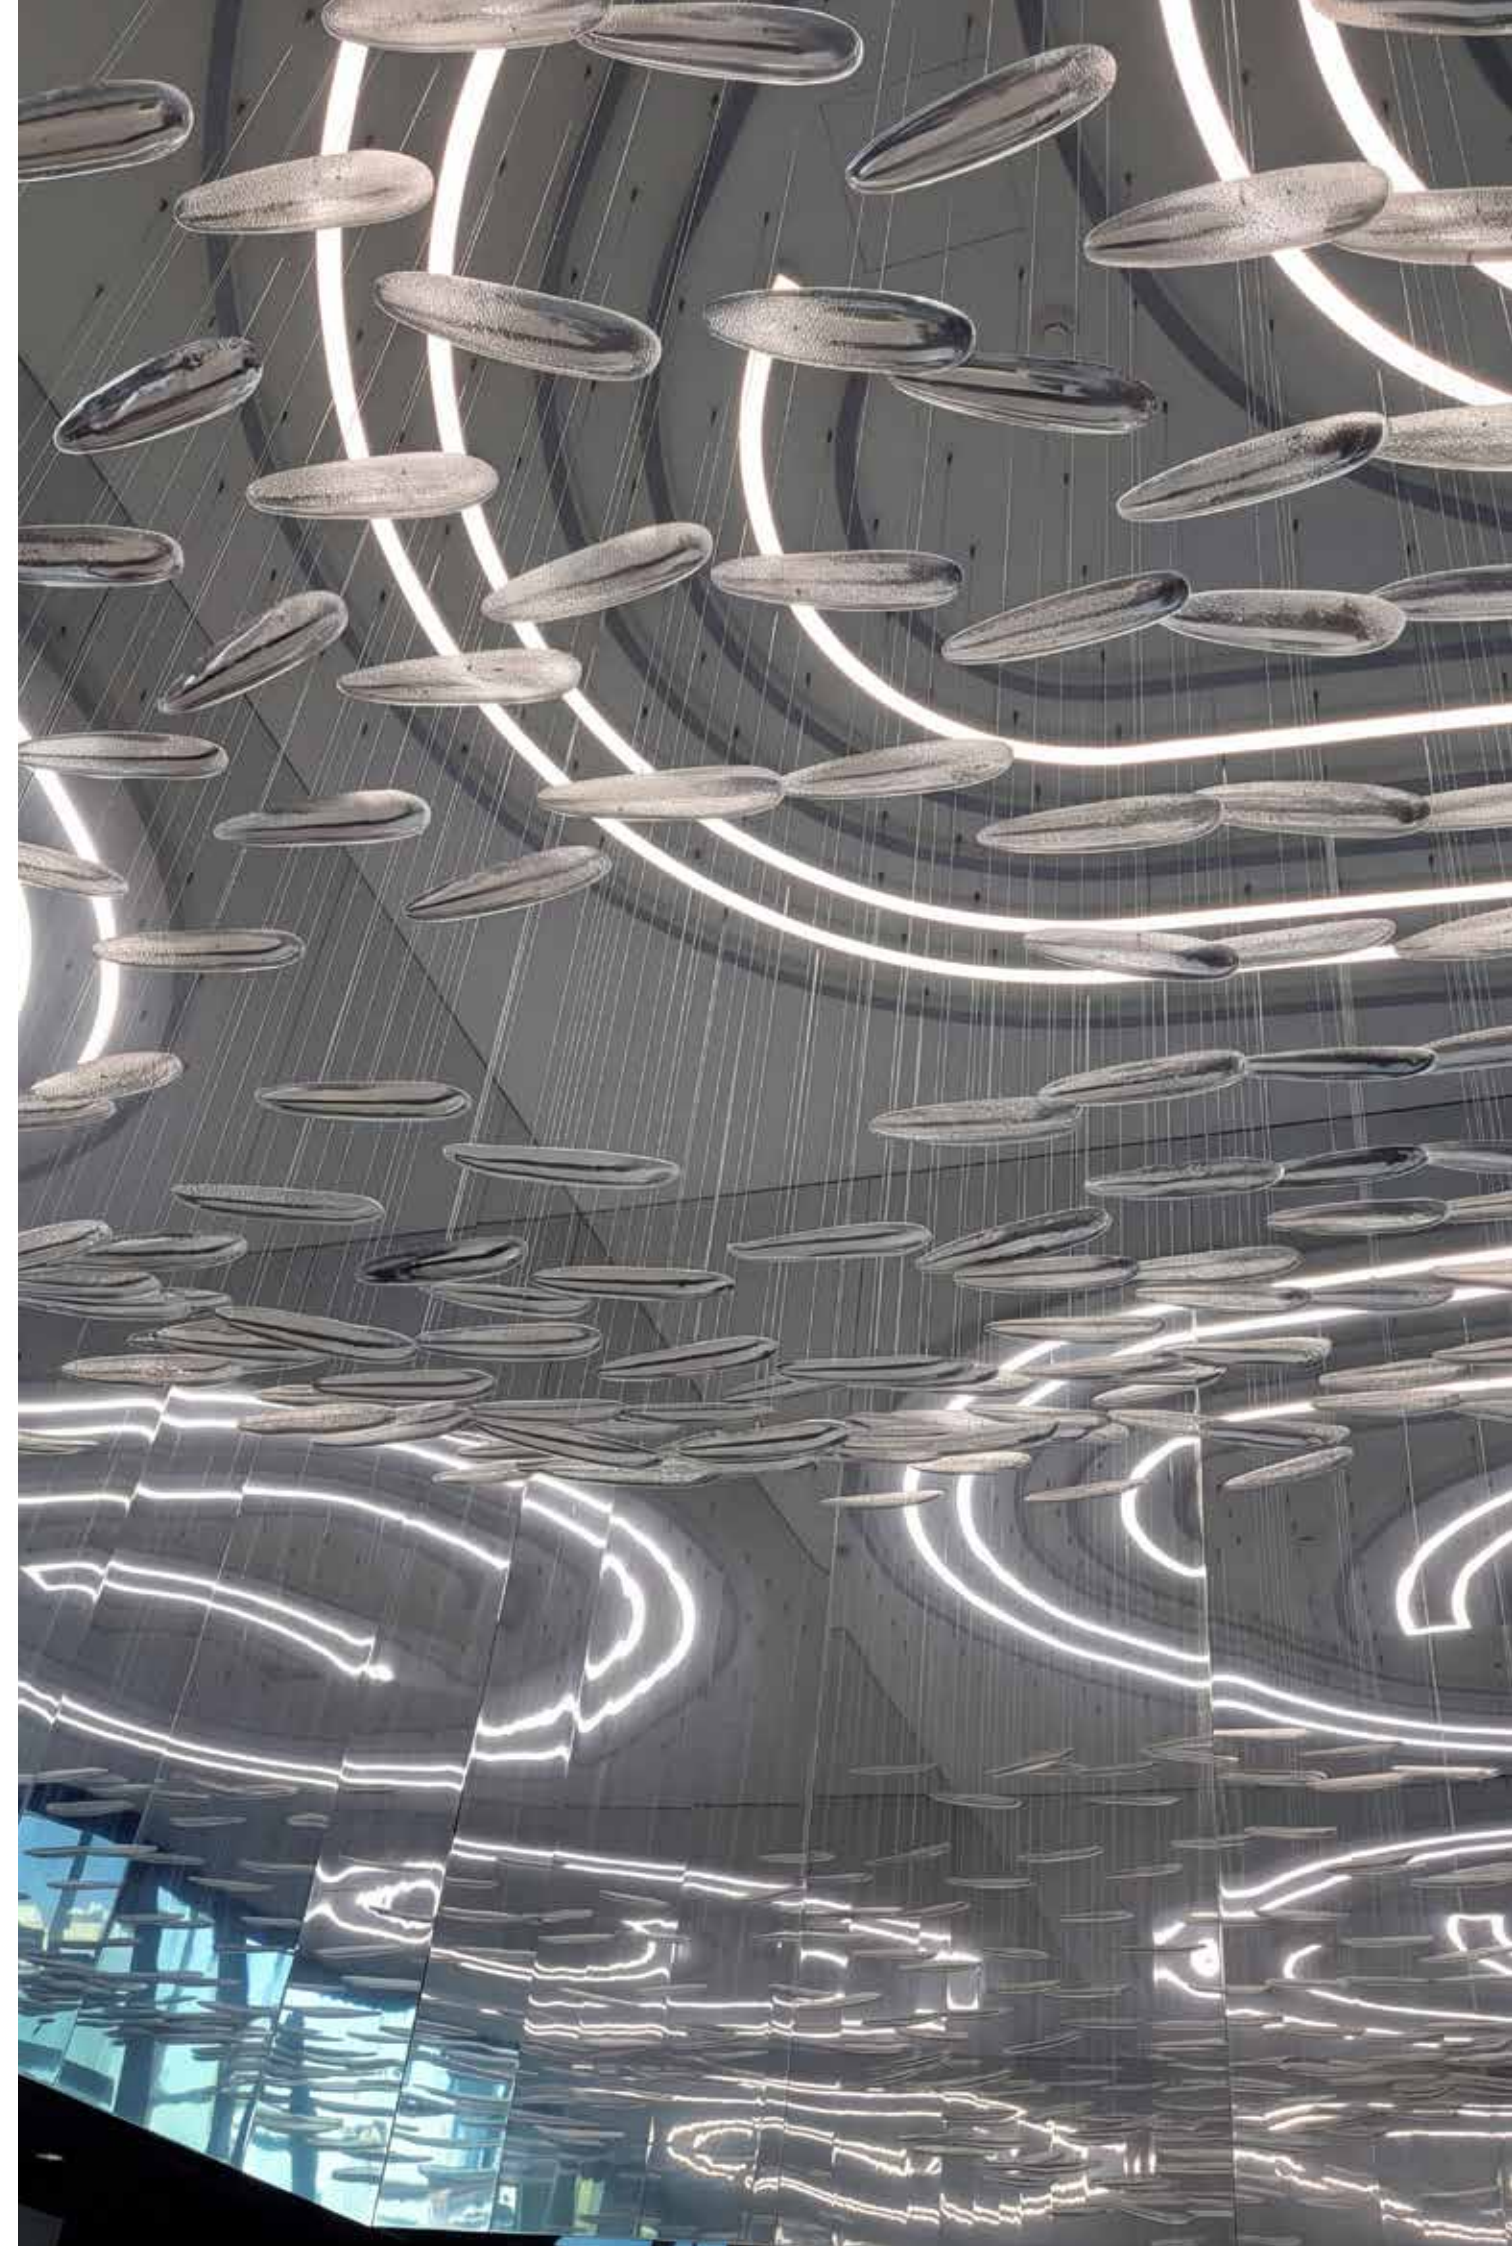

Falling Stones is a sculptural chandelier composed of handcrafted artistic glass elements. Its colour palette draws inspiration from the Baltic coast and natural amber, while the suspended forms create a dynamic interplay of light and transparency.

OCEAN OFFICE PARK

A constellation of silver glass forms suspended across the ceiling of Ocean Office Park. Their streamlined, futuristic shapes create an impression of objects floating weightlessly through space.

PRIVATE APARTMENT

A sculptural glass installation inspired by Salvador Dalí's iconic melting clocks. Designed for the private apartment of a well-known Polish actress, the composition translates the surrealist motif into a contemporary glass form.

FALLING STONES

Oval, irregular glass elements are perfect for modern interiors, especially in grey, white and black. Each chandelier is designed individually, we adjust the colour of the glass, the length of the installation, the power and the colour of the light. The installation is available with a metal top canopy in any size and colour, we also use a solution with hidden fixings in the false ceiling.

AUTUMN LEAVES

Autumn leaves spinning in the wind, glass elements handmade by the old Venetian Murano method, coloured with metal oxides or pure gold. Each chandelier is designed individually, we adjust the colour of the glass, the length of the installation, the power and the colour of the light. The installation is available with a metal top canopy in any size and colour, we also use a solution with hidden fixings in the false ceiling.

BIRDS

Irregular glass elements are perfect for modern interiors, especially in grey, white and gold. Each chandelier is designed individually, we adjust the colour of the glass, the length of the installation, the power and the colour of the light. The installation is available with a metal top canopy in any size and colour, we also use a solution with hidden fixings in the false ceiling.

PRIVATE INTERIOR

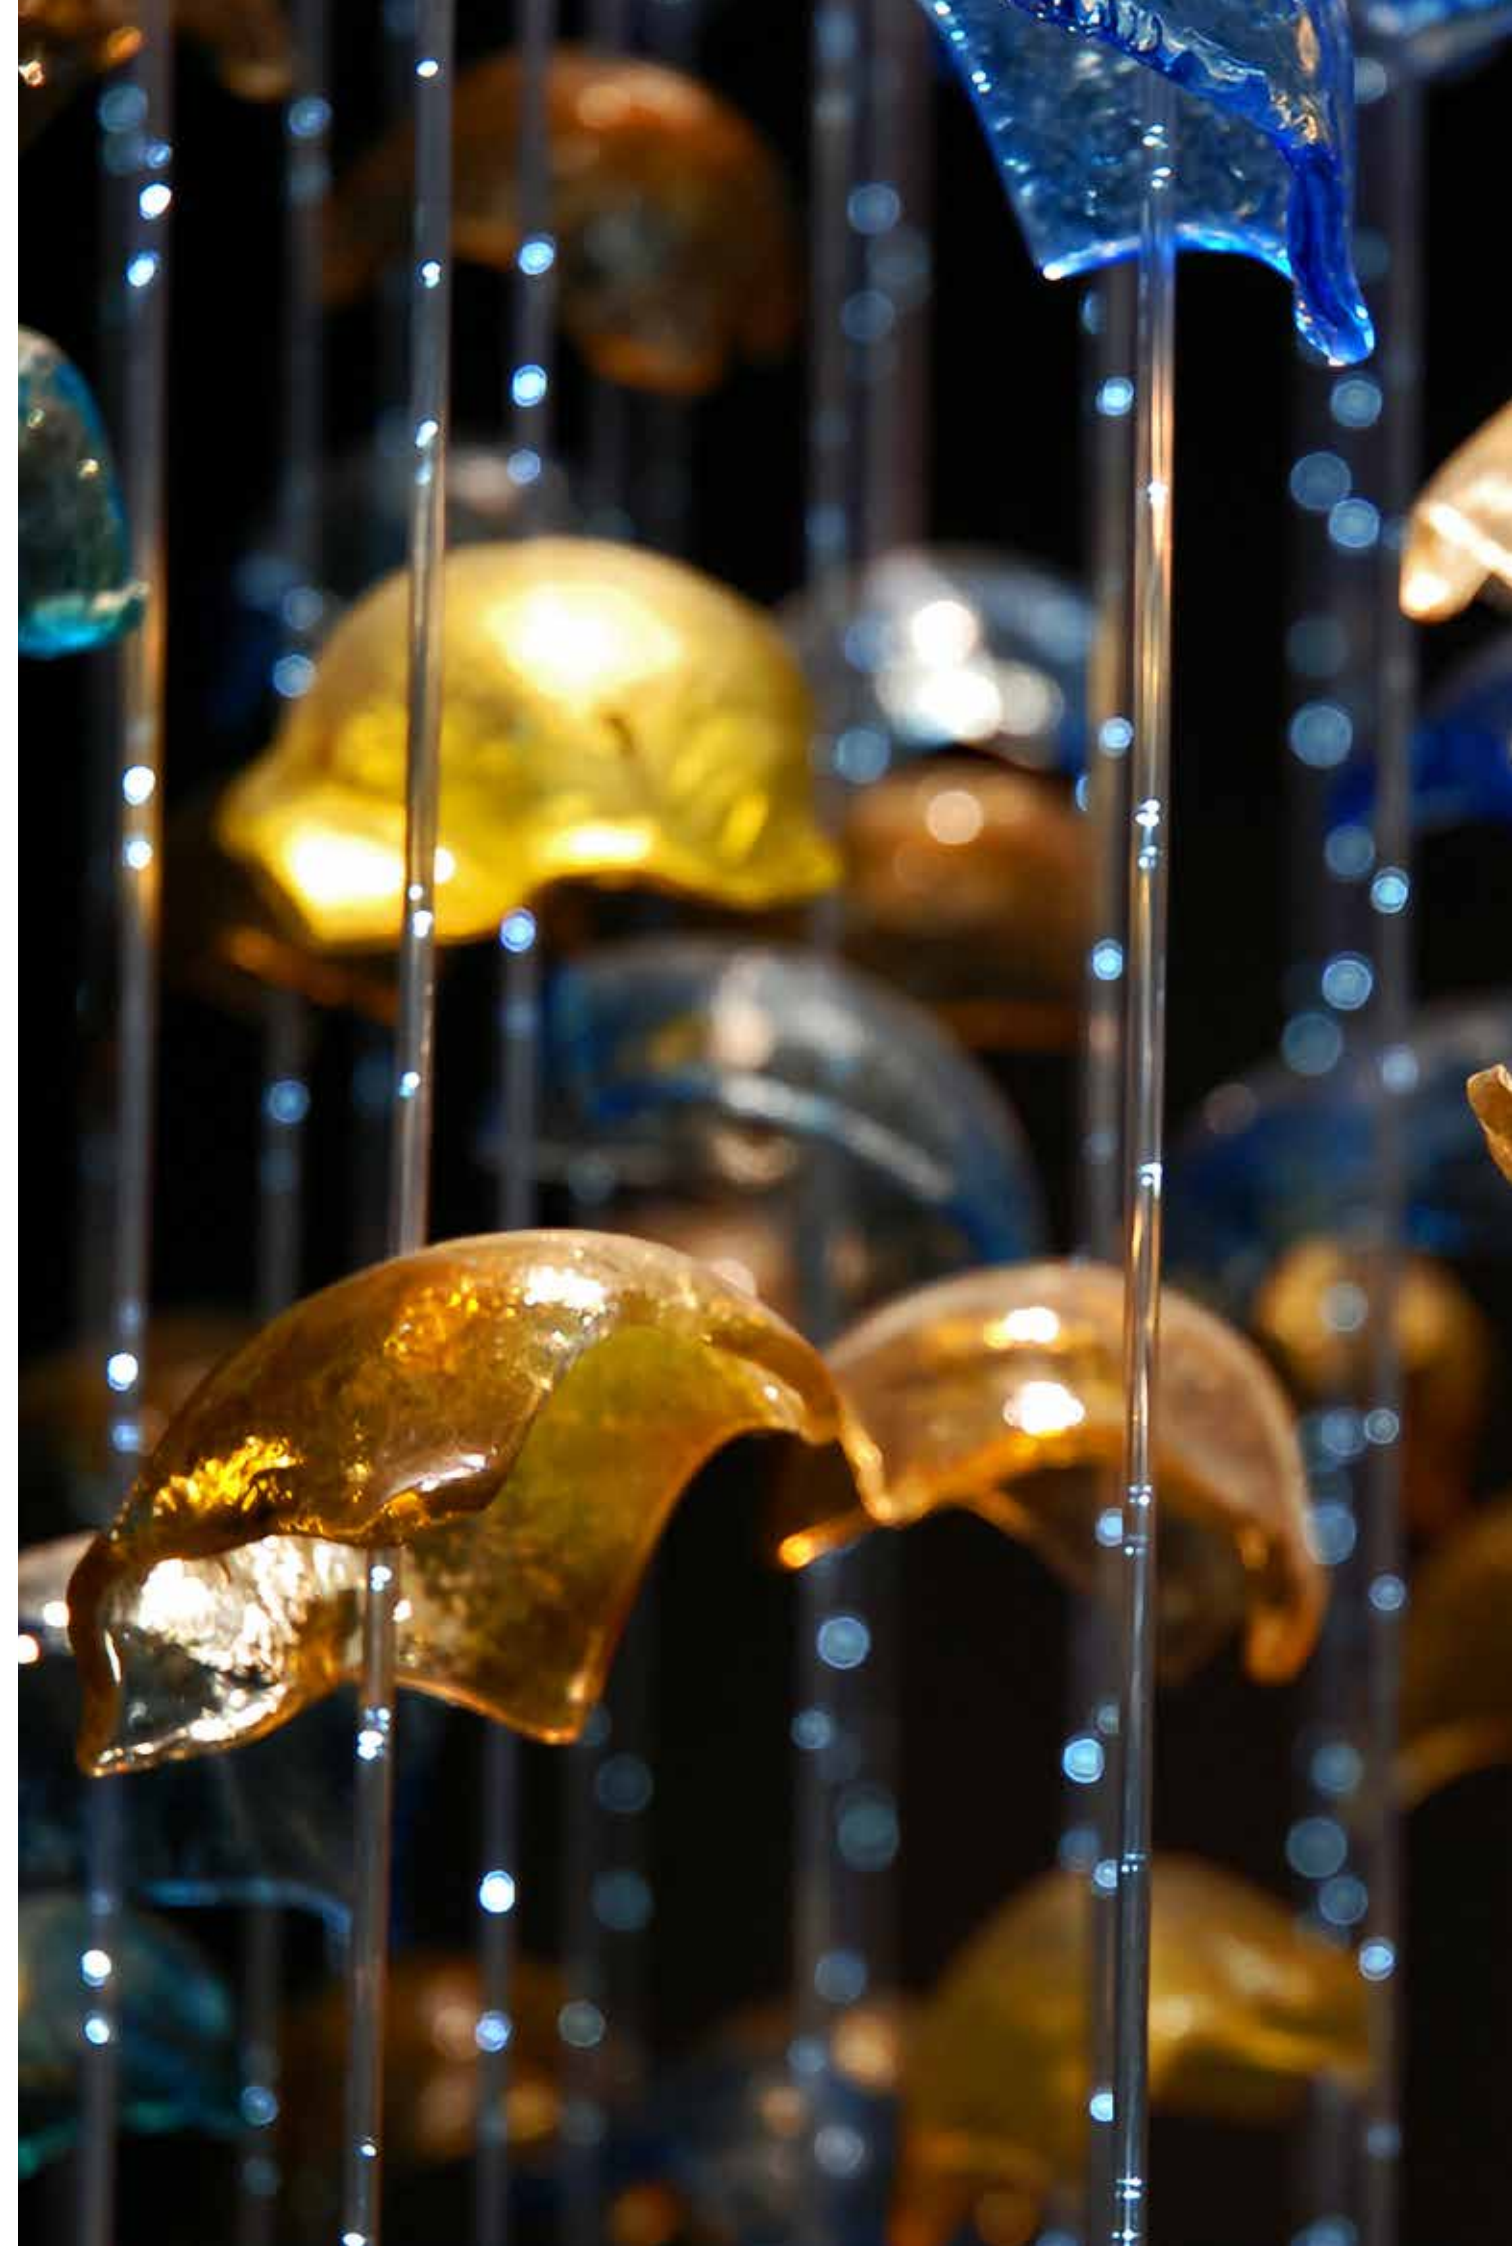

An example of adapting the installation to the interior design. The length and width are selected in accordance with the existing architecture of the false ceiling, railings and steps. The white and transparent colours of the glass add lightness and modernity to the interior, the upper metal frame, painted white, becomes invisible. The entire LCD colour and light intensity are electronically controlled from the phone.

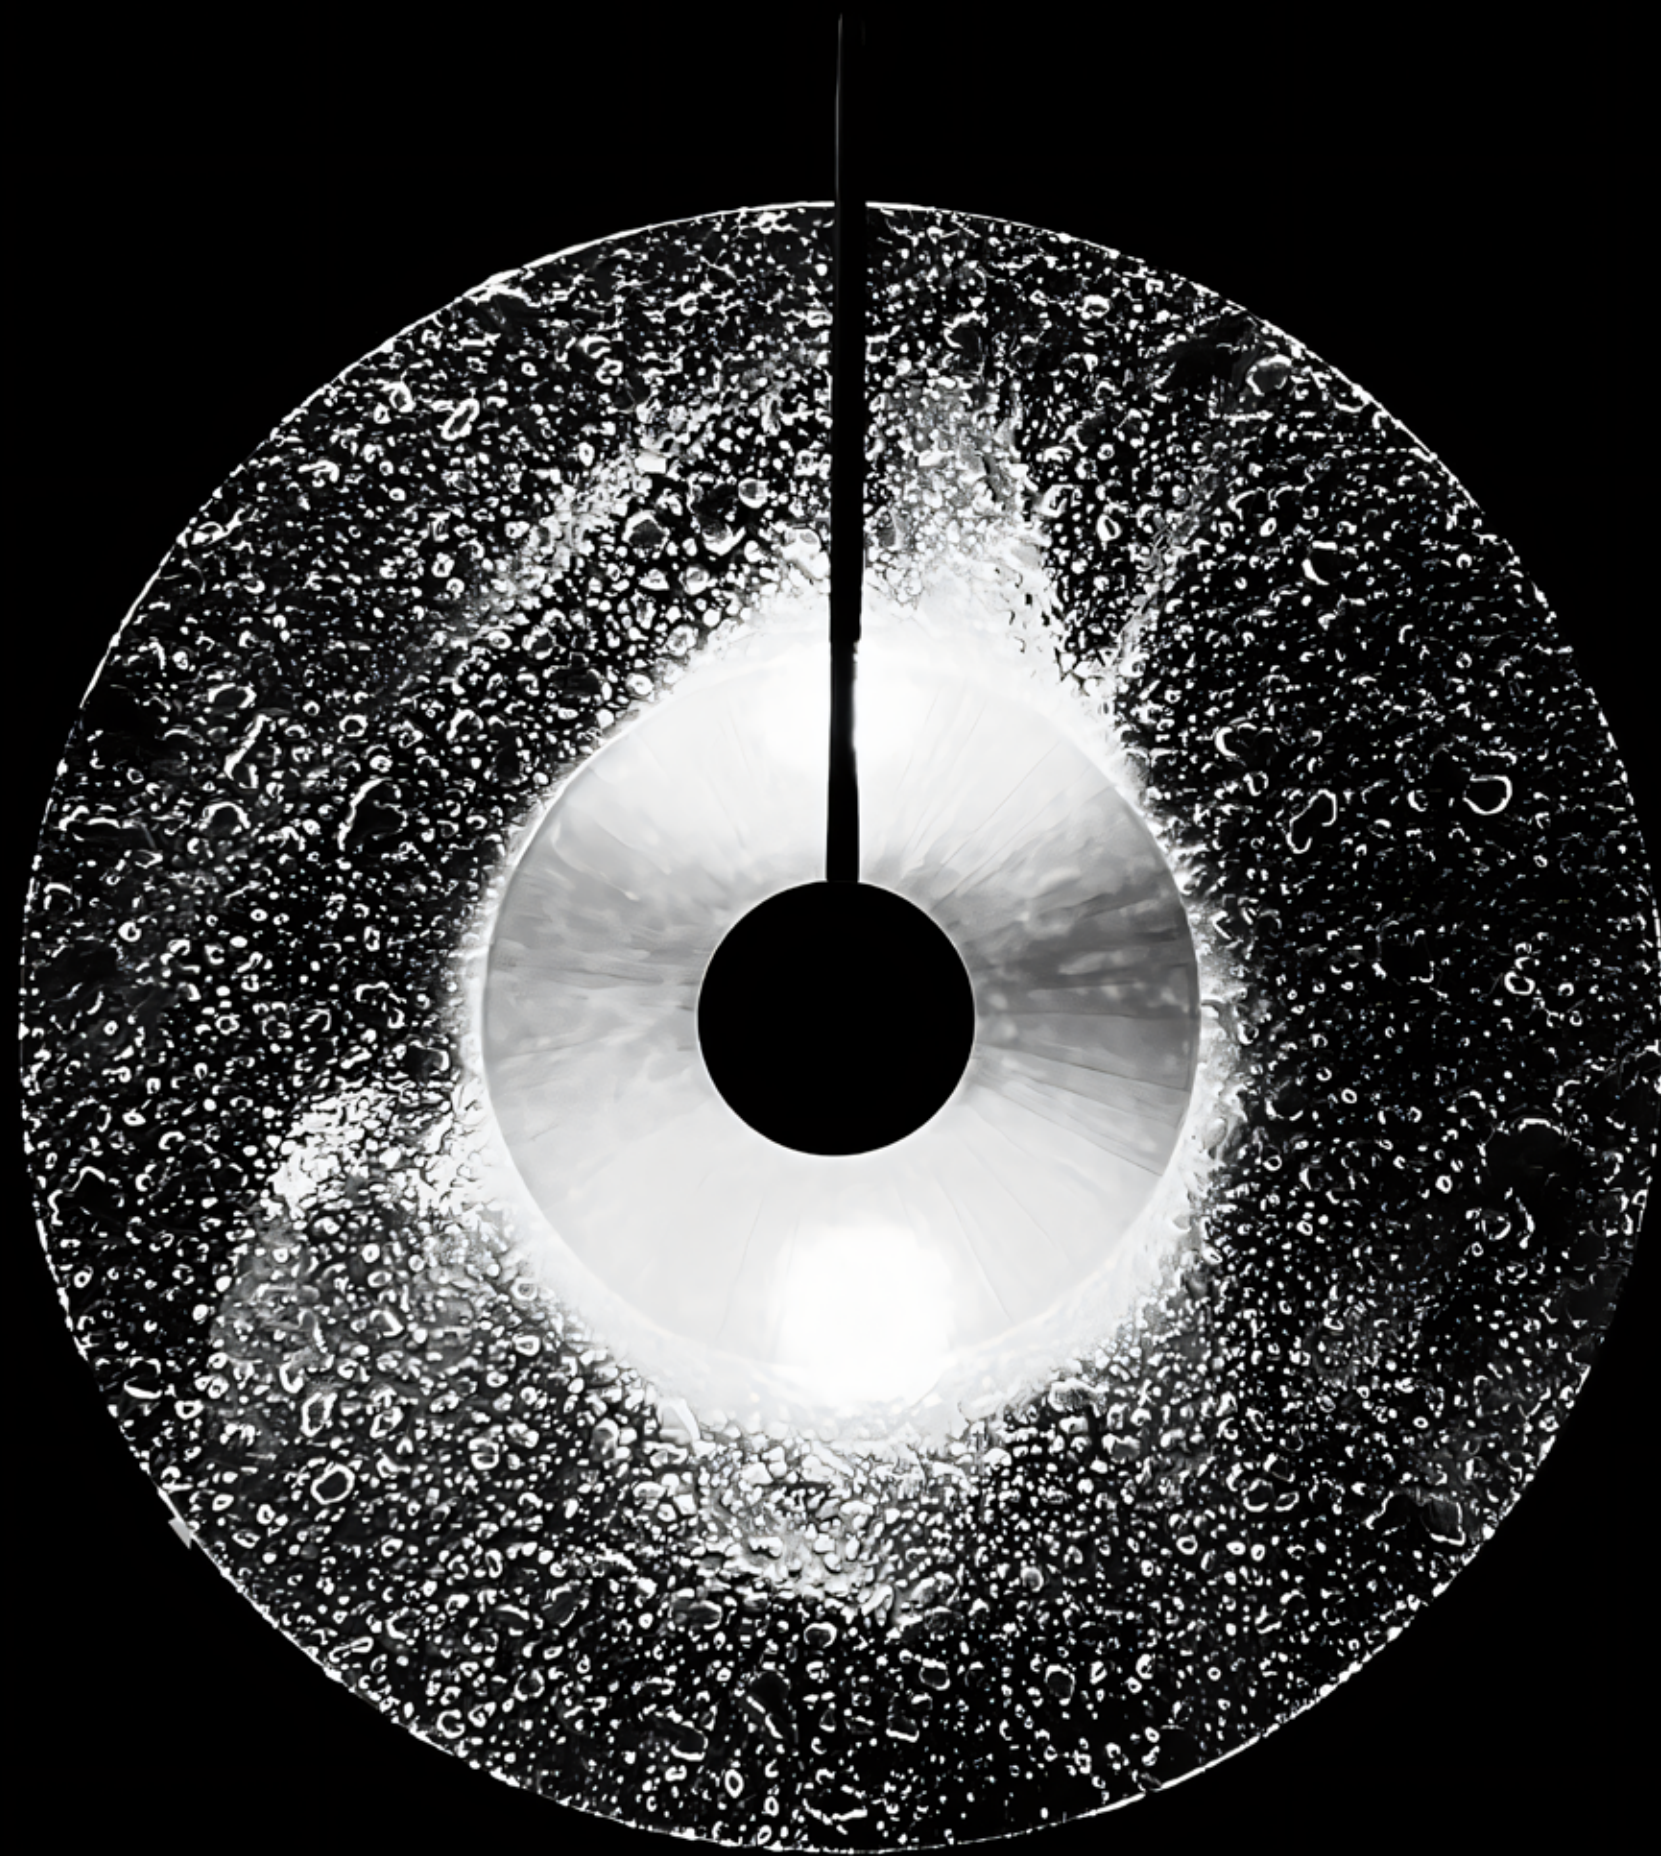

SEA FLOWERS

The shimmering glass elements hanging in space reminded us of the ocean, jellyfish and flowers, hence the name Sea Flowers. Each chandelier is designed individually, we adjust the colour of the glass, the length of the installation, the power and the colour of the light. The installation is available with a metal top canopy in any size and colour, we also use a solution with hidden fixings in the false ceiling.

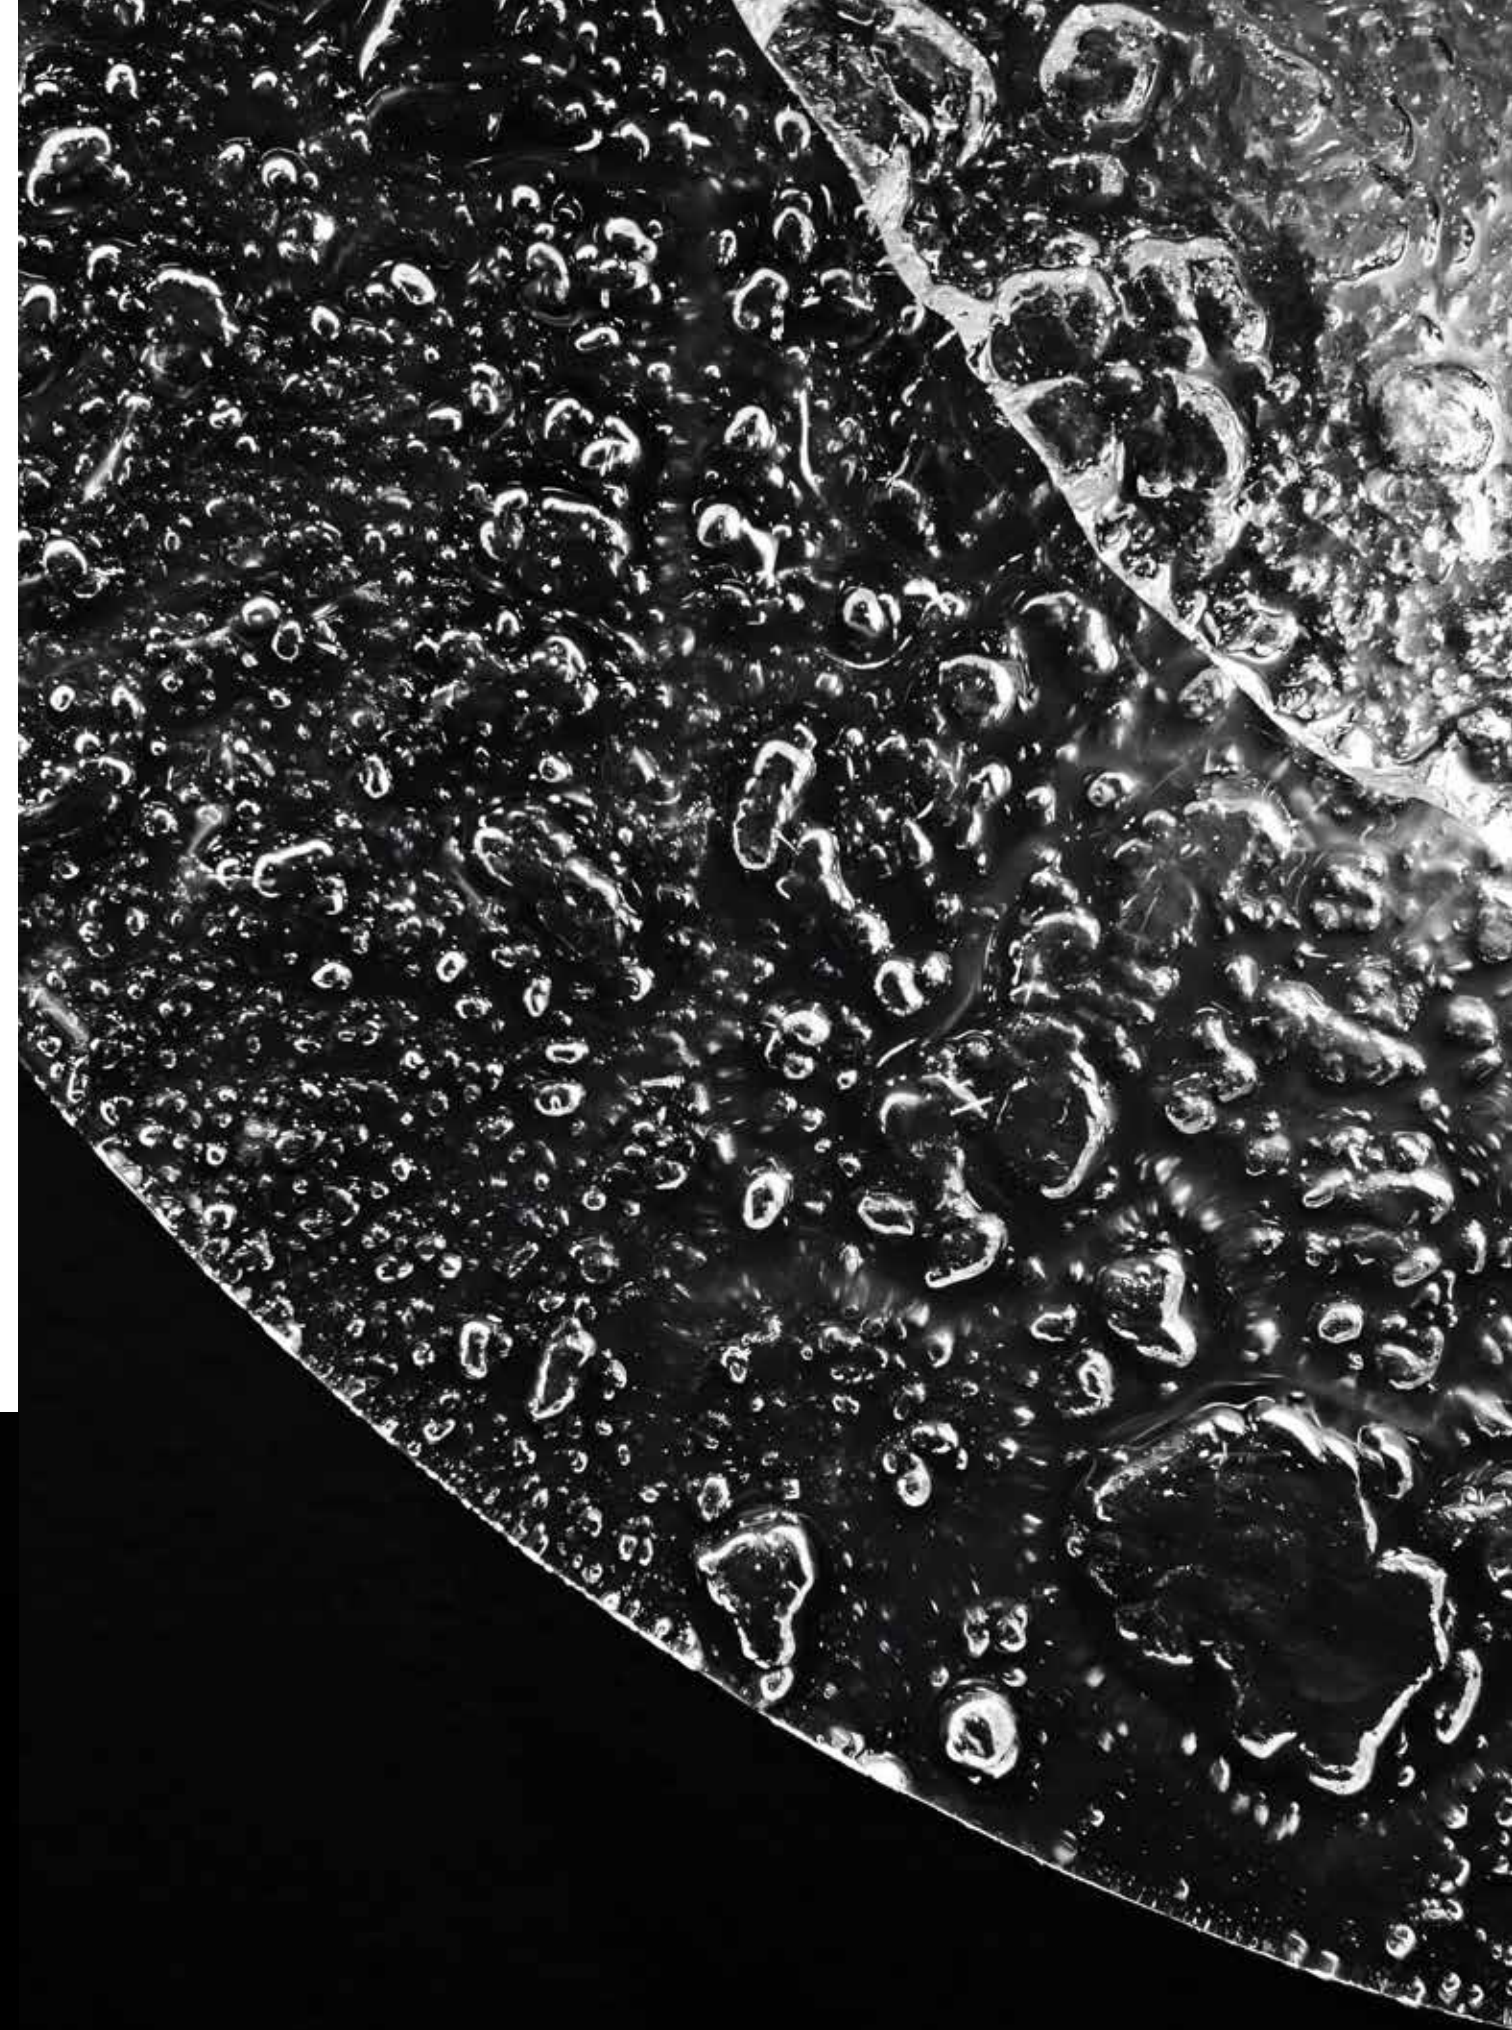

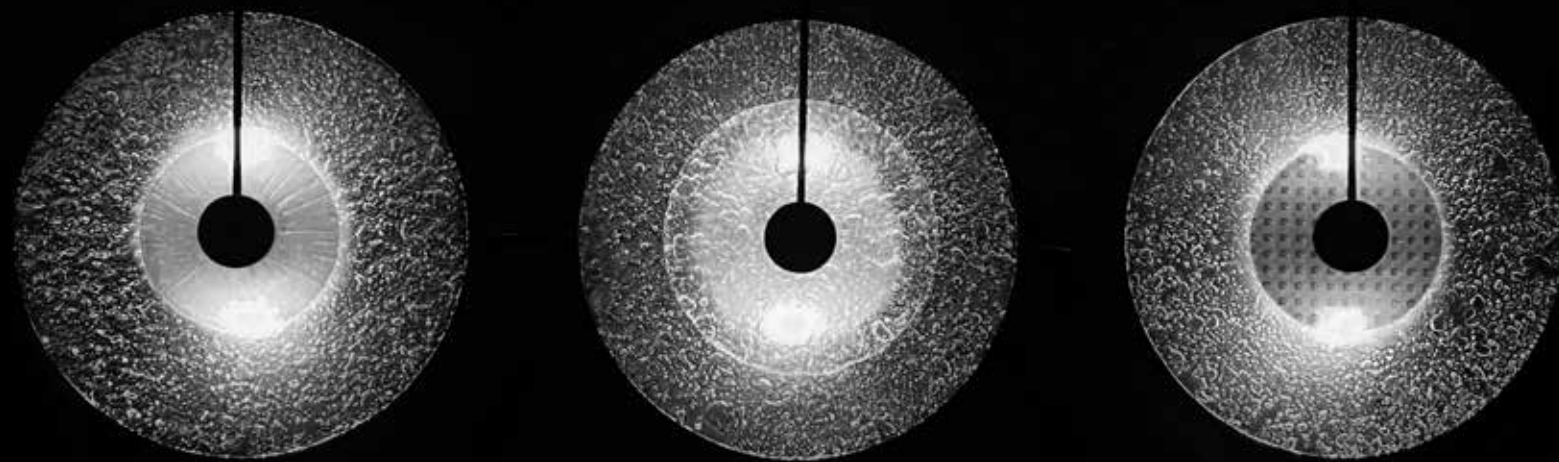

FROZEN LAKE

This round glass wall sconce resembles the structure of a frozen lake, with its delicate patterns and icy hues. Its design evokes the tranquil beauty of winter landscapes, adding a touch of elegance to any space. The Winter Lake Sconce is available in three different sizes, offering versatility to suit various spaces. Additionally, the pattern of the inner element can be customized to meet specific design preferences.

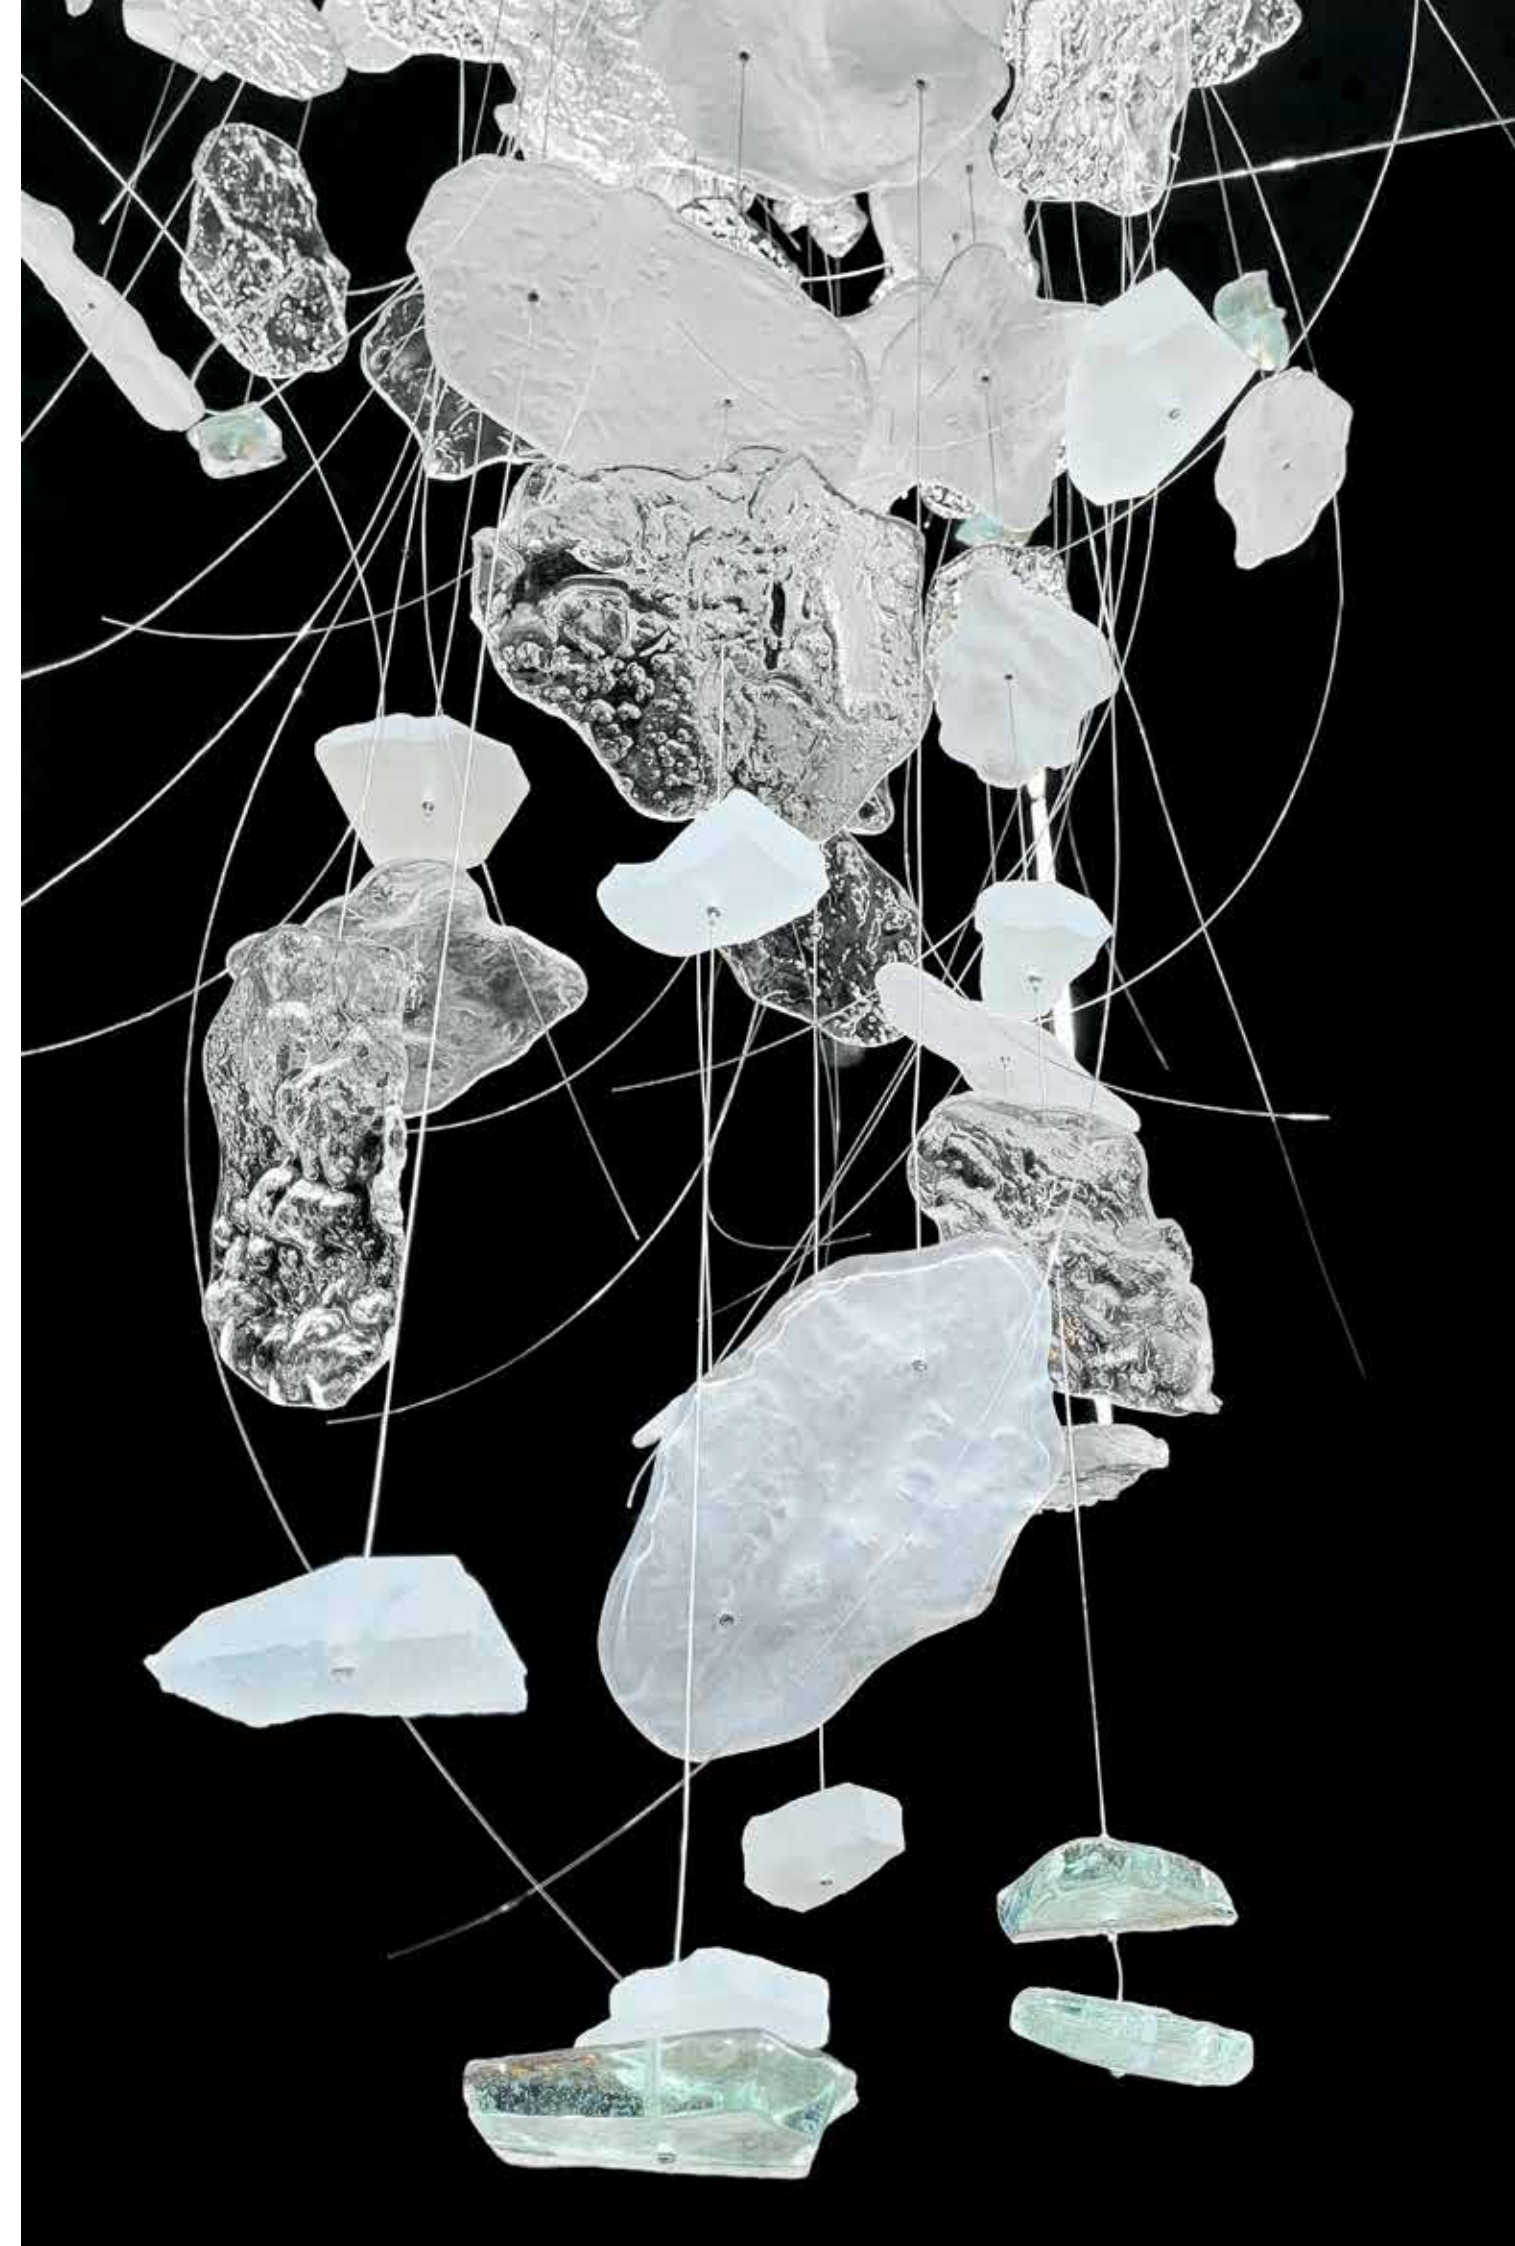

ALICE IN THE WONDERLAND

Artistic, unique light compositions are often created on request, such as „Alice’s Garden”. A magical world of hand-made colorful glass flowers, leaves and brass twigs with fruit balls blown from antico glass sparkling inside. The whole thing consists of 20 modules, which allows it to be adapted to various interior sizes.

WINTER LAND

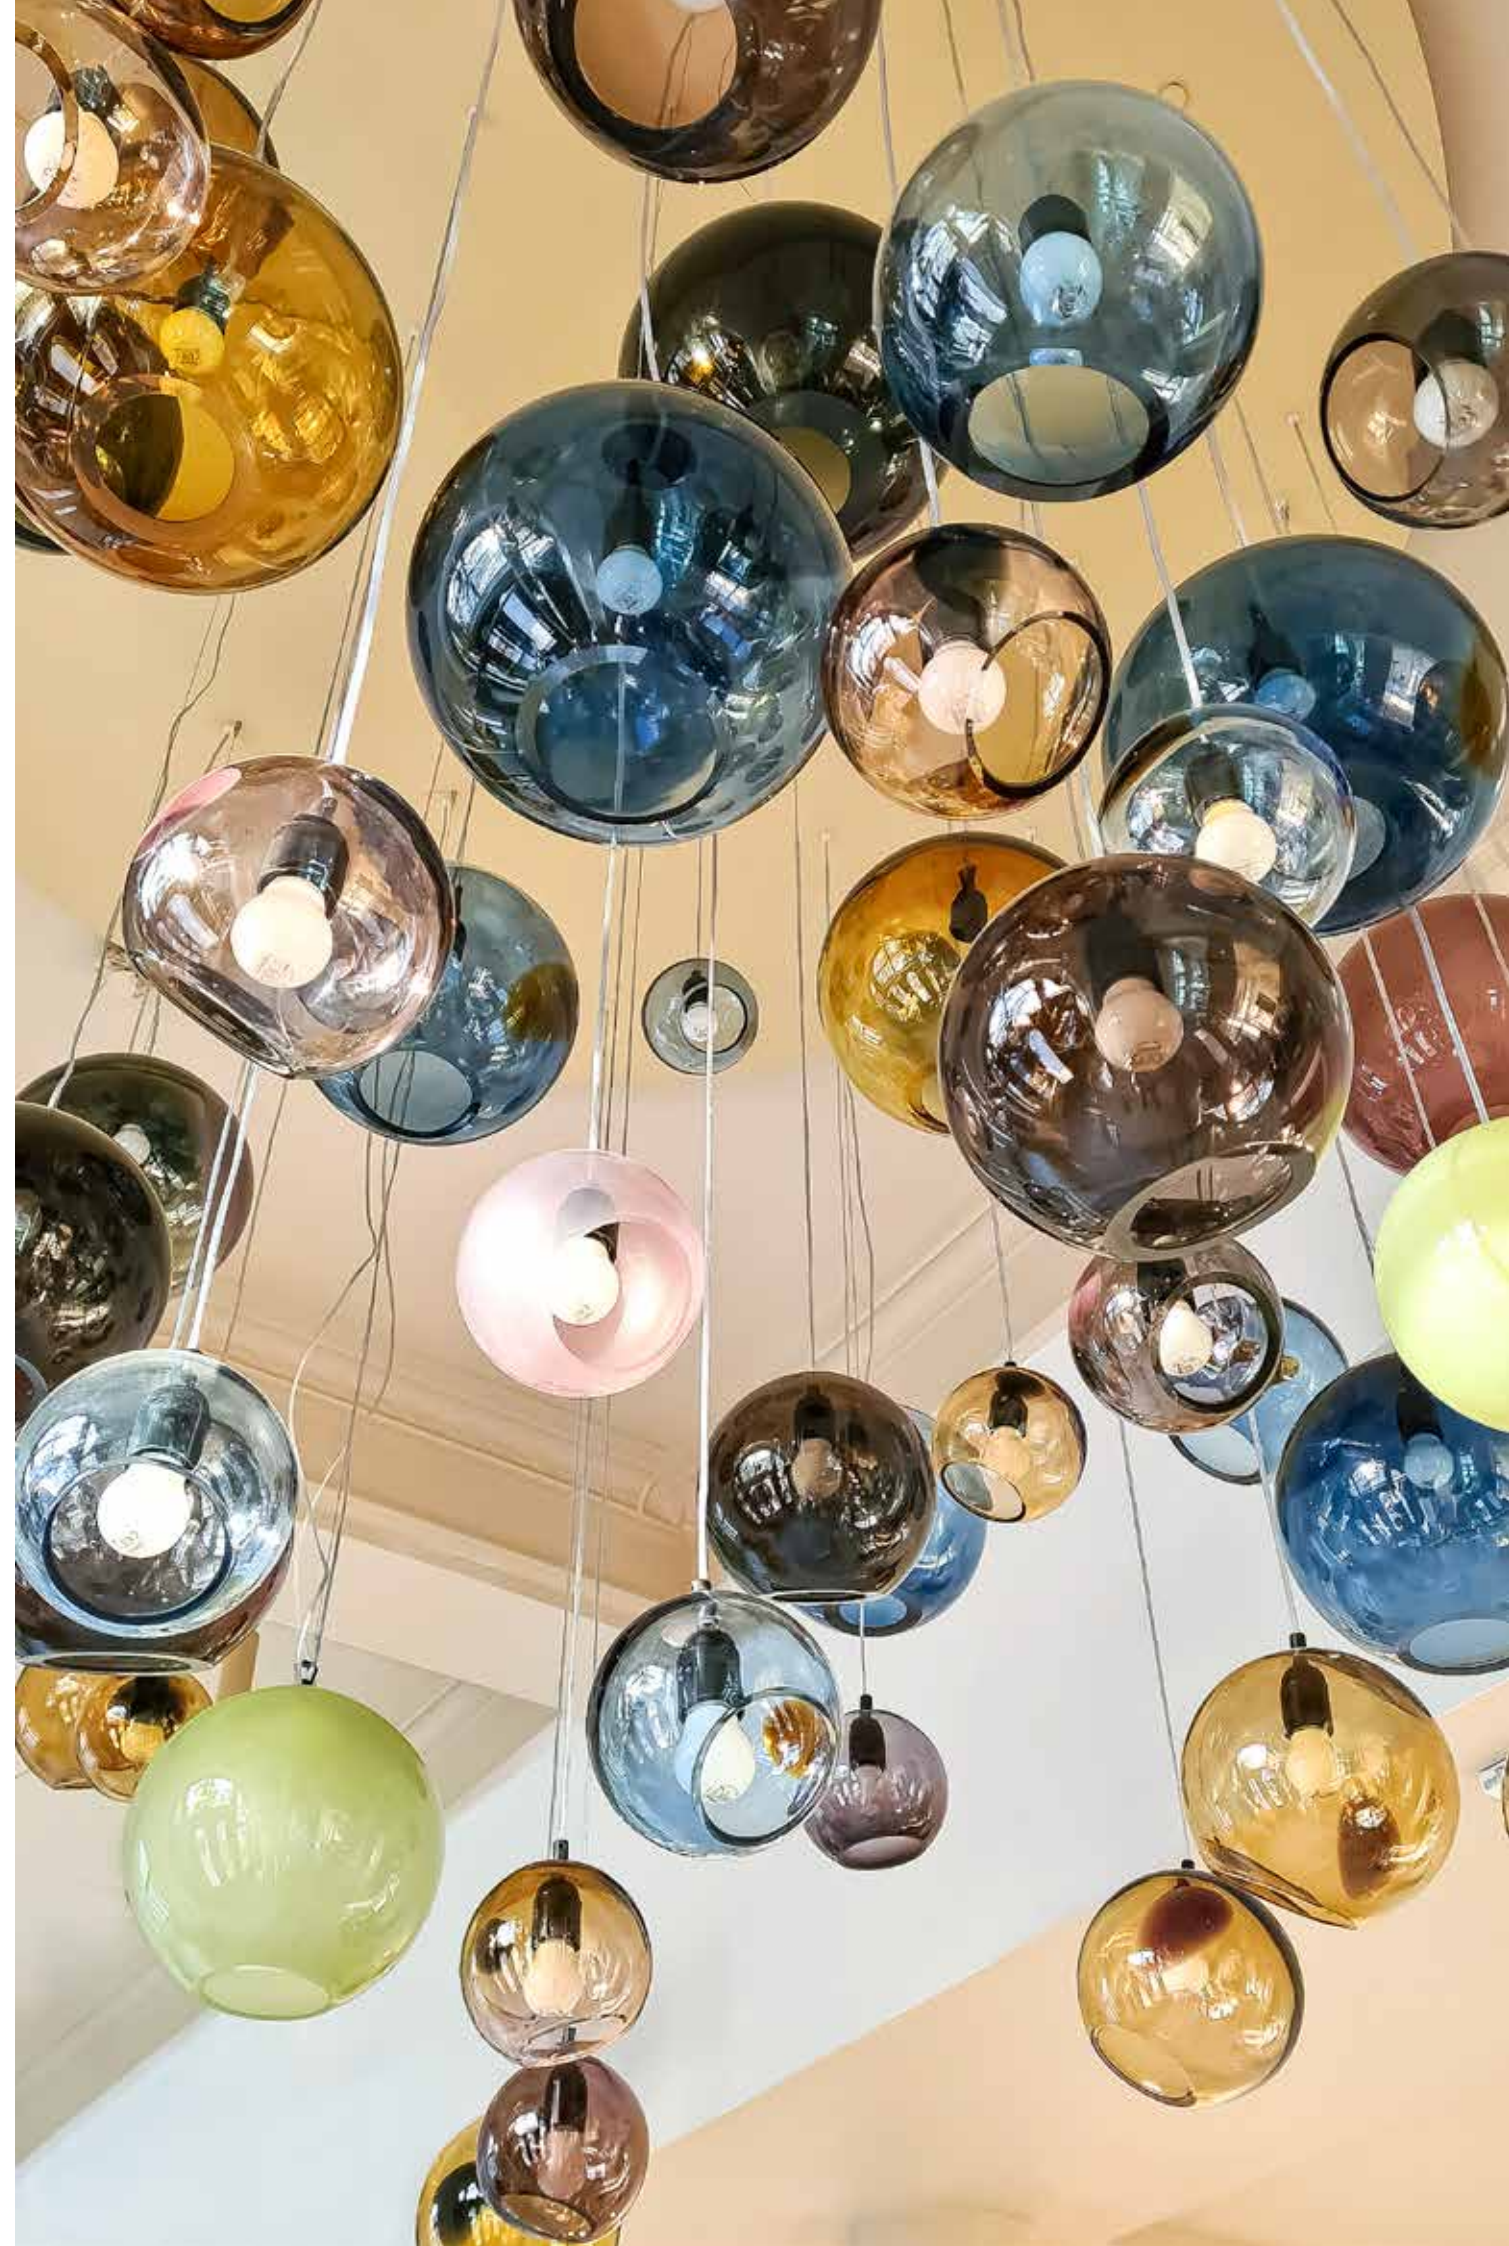

The Winter Land chandelier is a unique light installation that carries the interior into a frosty realm of clouds with its delicate, irregular glass elements.

OLD FABLES

Colorful balls, of various sizes and colors, sometimes with extra stains, each irregularly open, a bit like the old soap bubble game. Each chandelier is designed individually, we adjust the colour of the glass, the length of the installation, the power and the colour of the light. The installation is available with a metal top canopy in any size and colour, we also use a solution with hidden fixings in the false ceiling.

STRUCTURAL CIRCLES

Infinite illumination of interpenetrating compositions of geometric peaks, each evening is a new adventure in discovering new effects in the space around the chandeliers made of hand-formed glass plates.

spg
GOLD & PLATINUM MEMBERS

SEA BIRDS

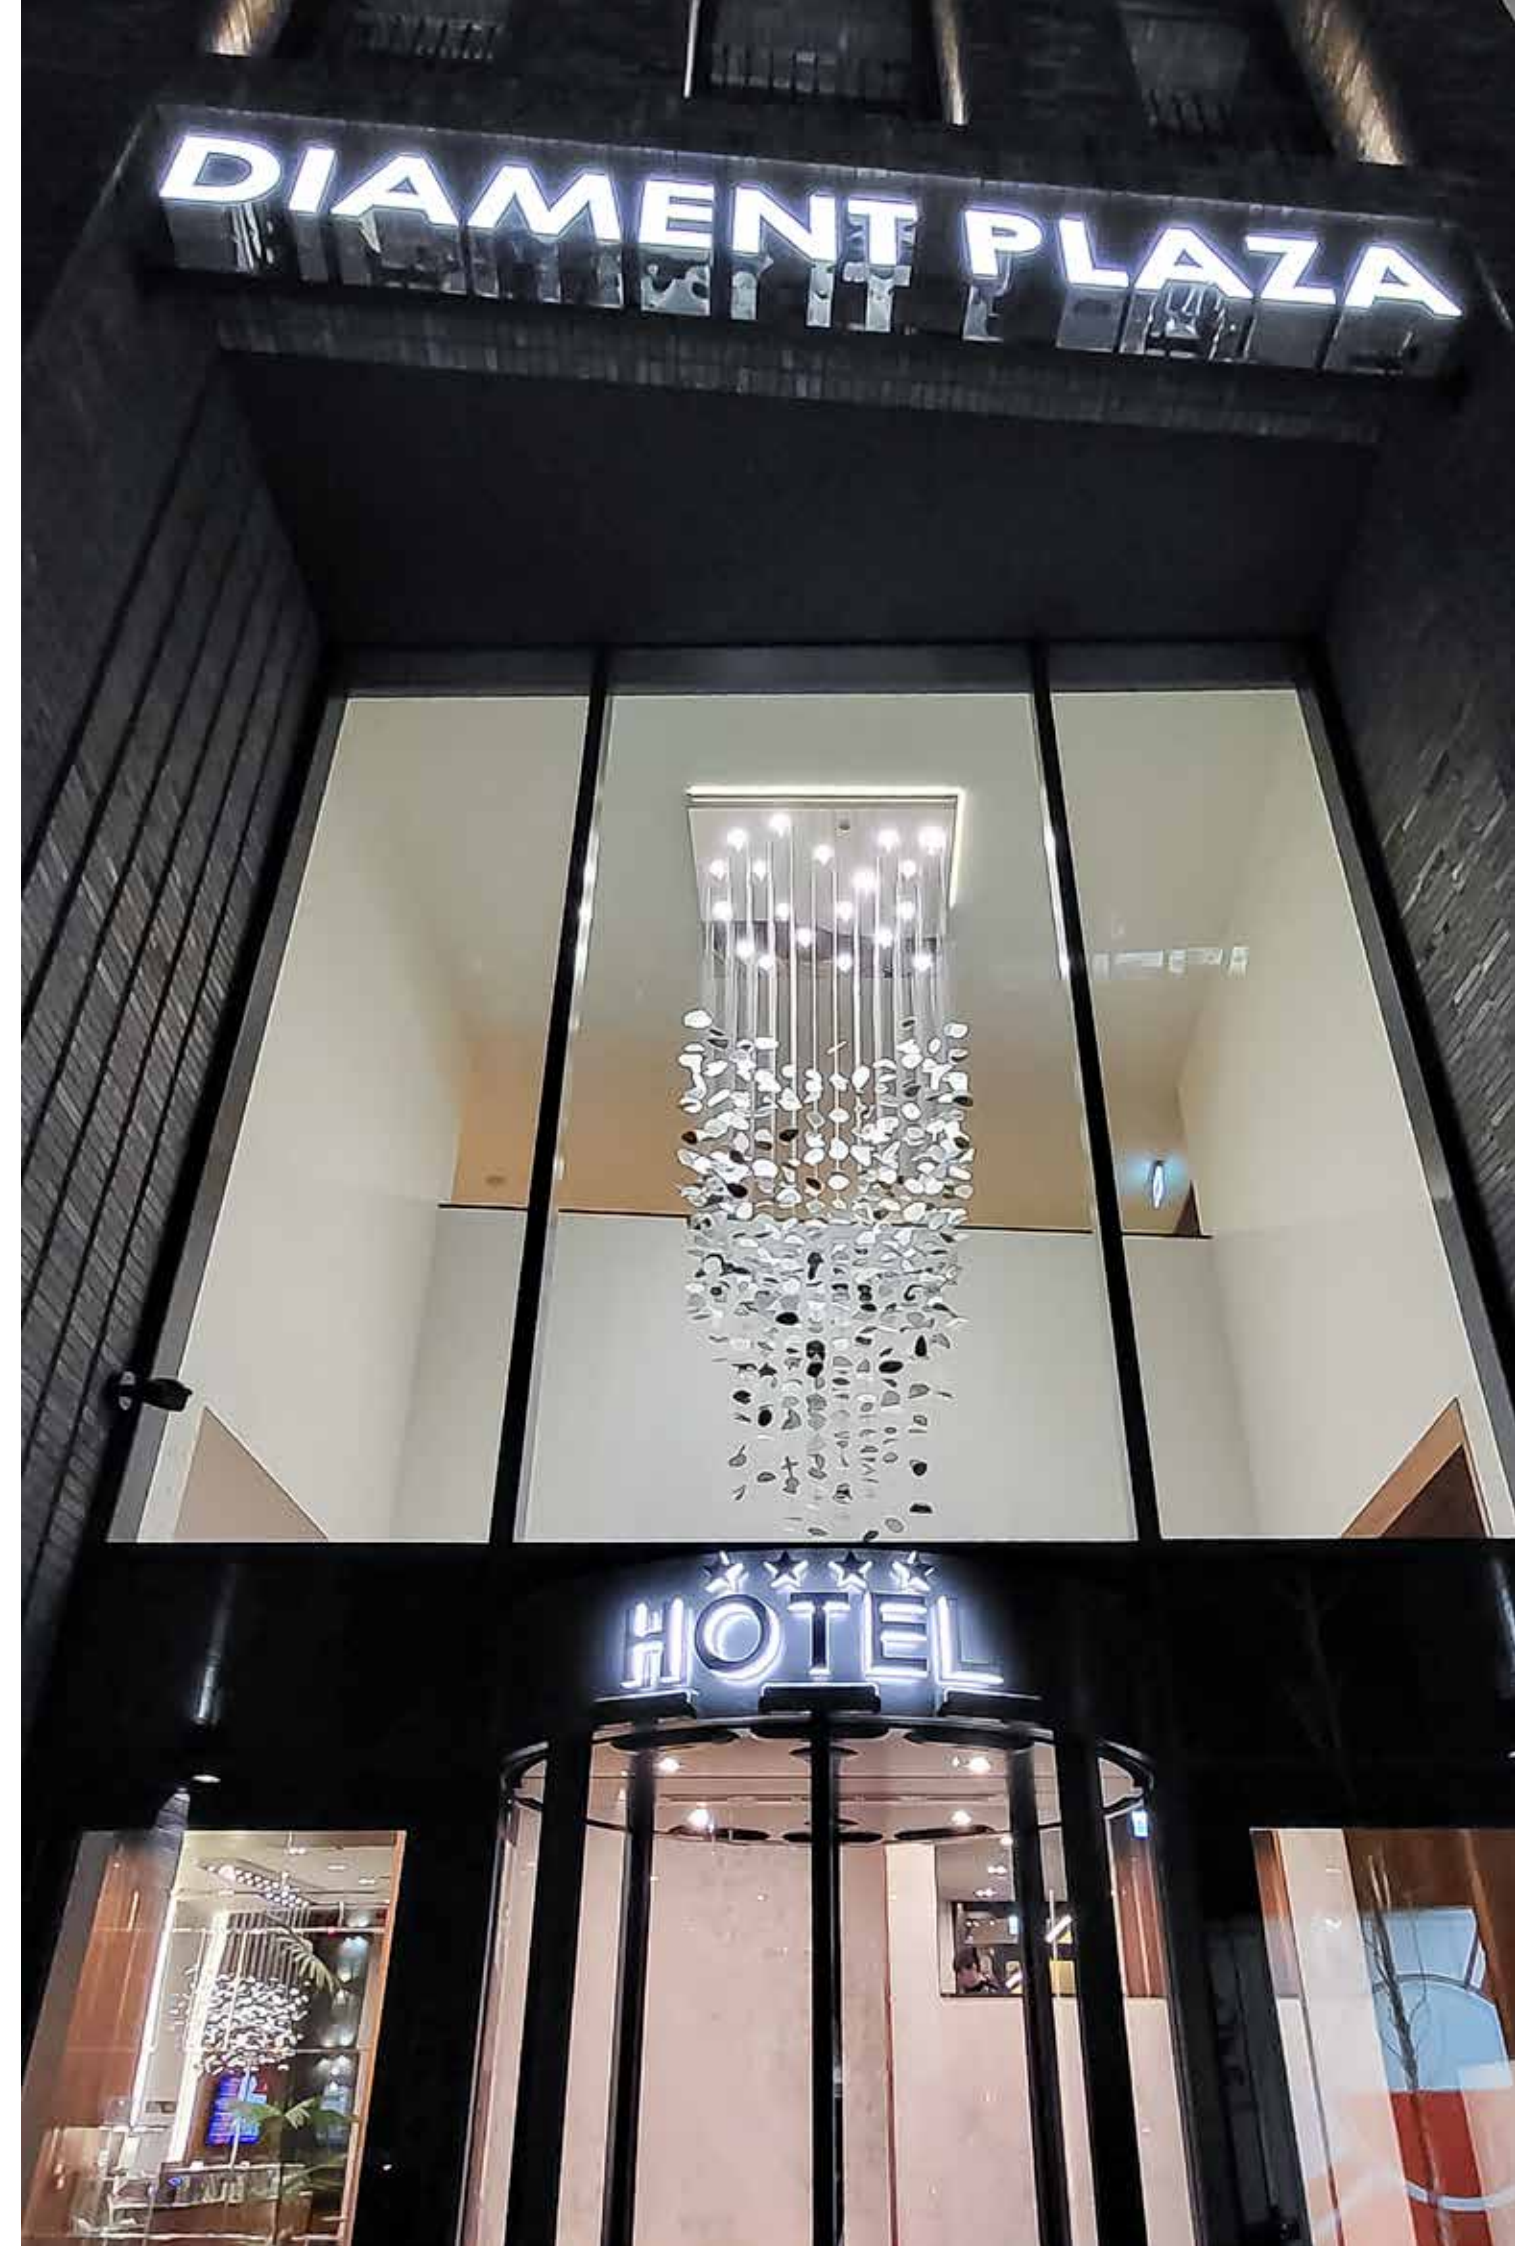

Sea Birds is a sister project of Sea Flowers. In keeping with current trends, the form is simpler and more geometric, based on a square projected onto a sphere. Its lines fit with any modern interior. Sea Birds is available on request in a variety of sizes.

HOTEL

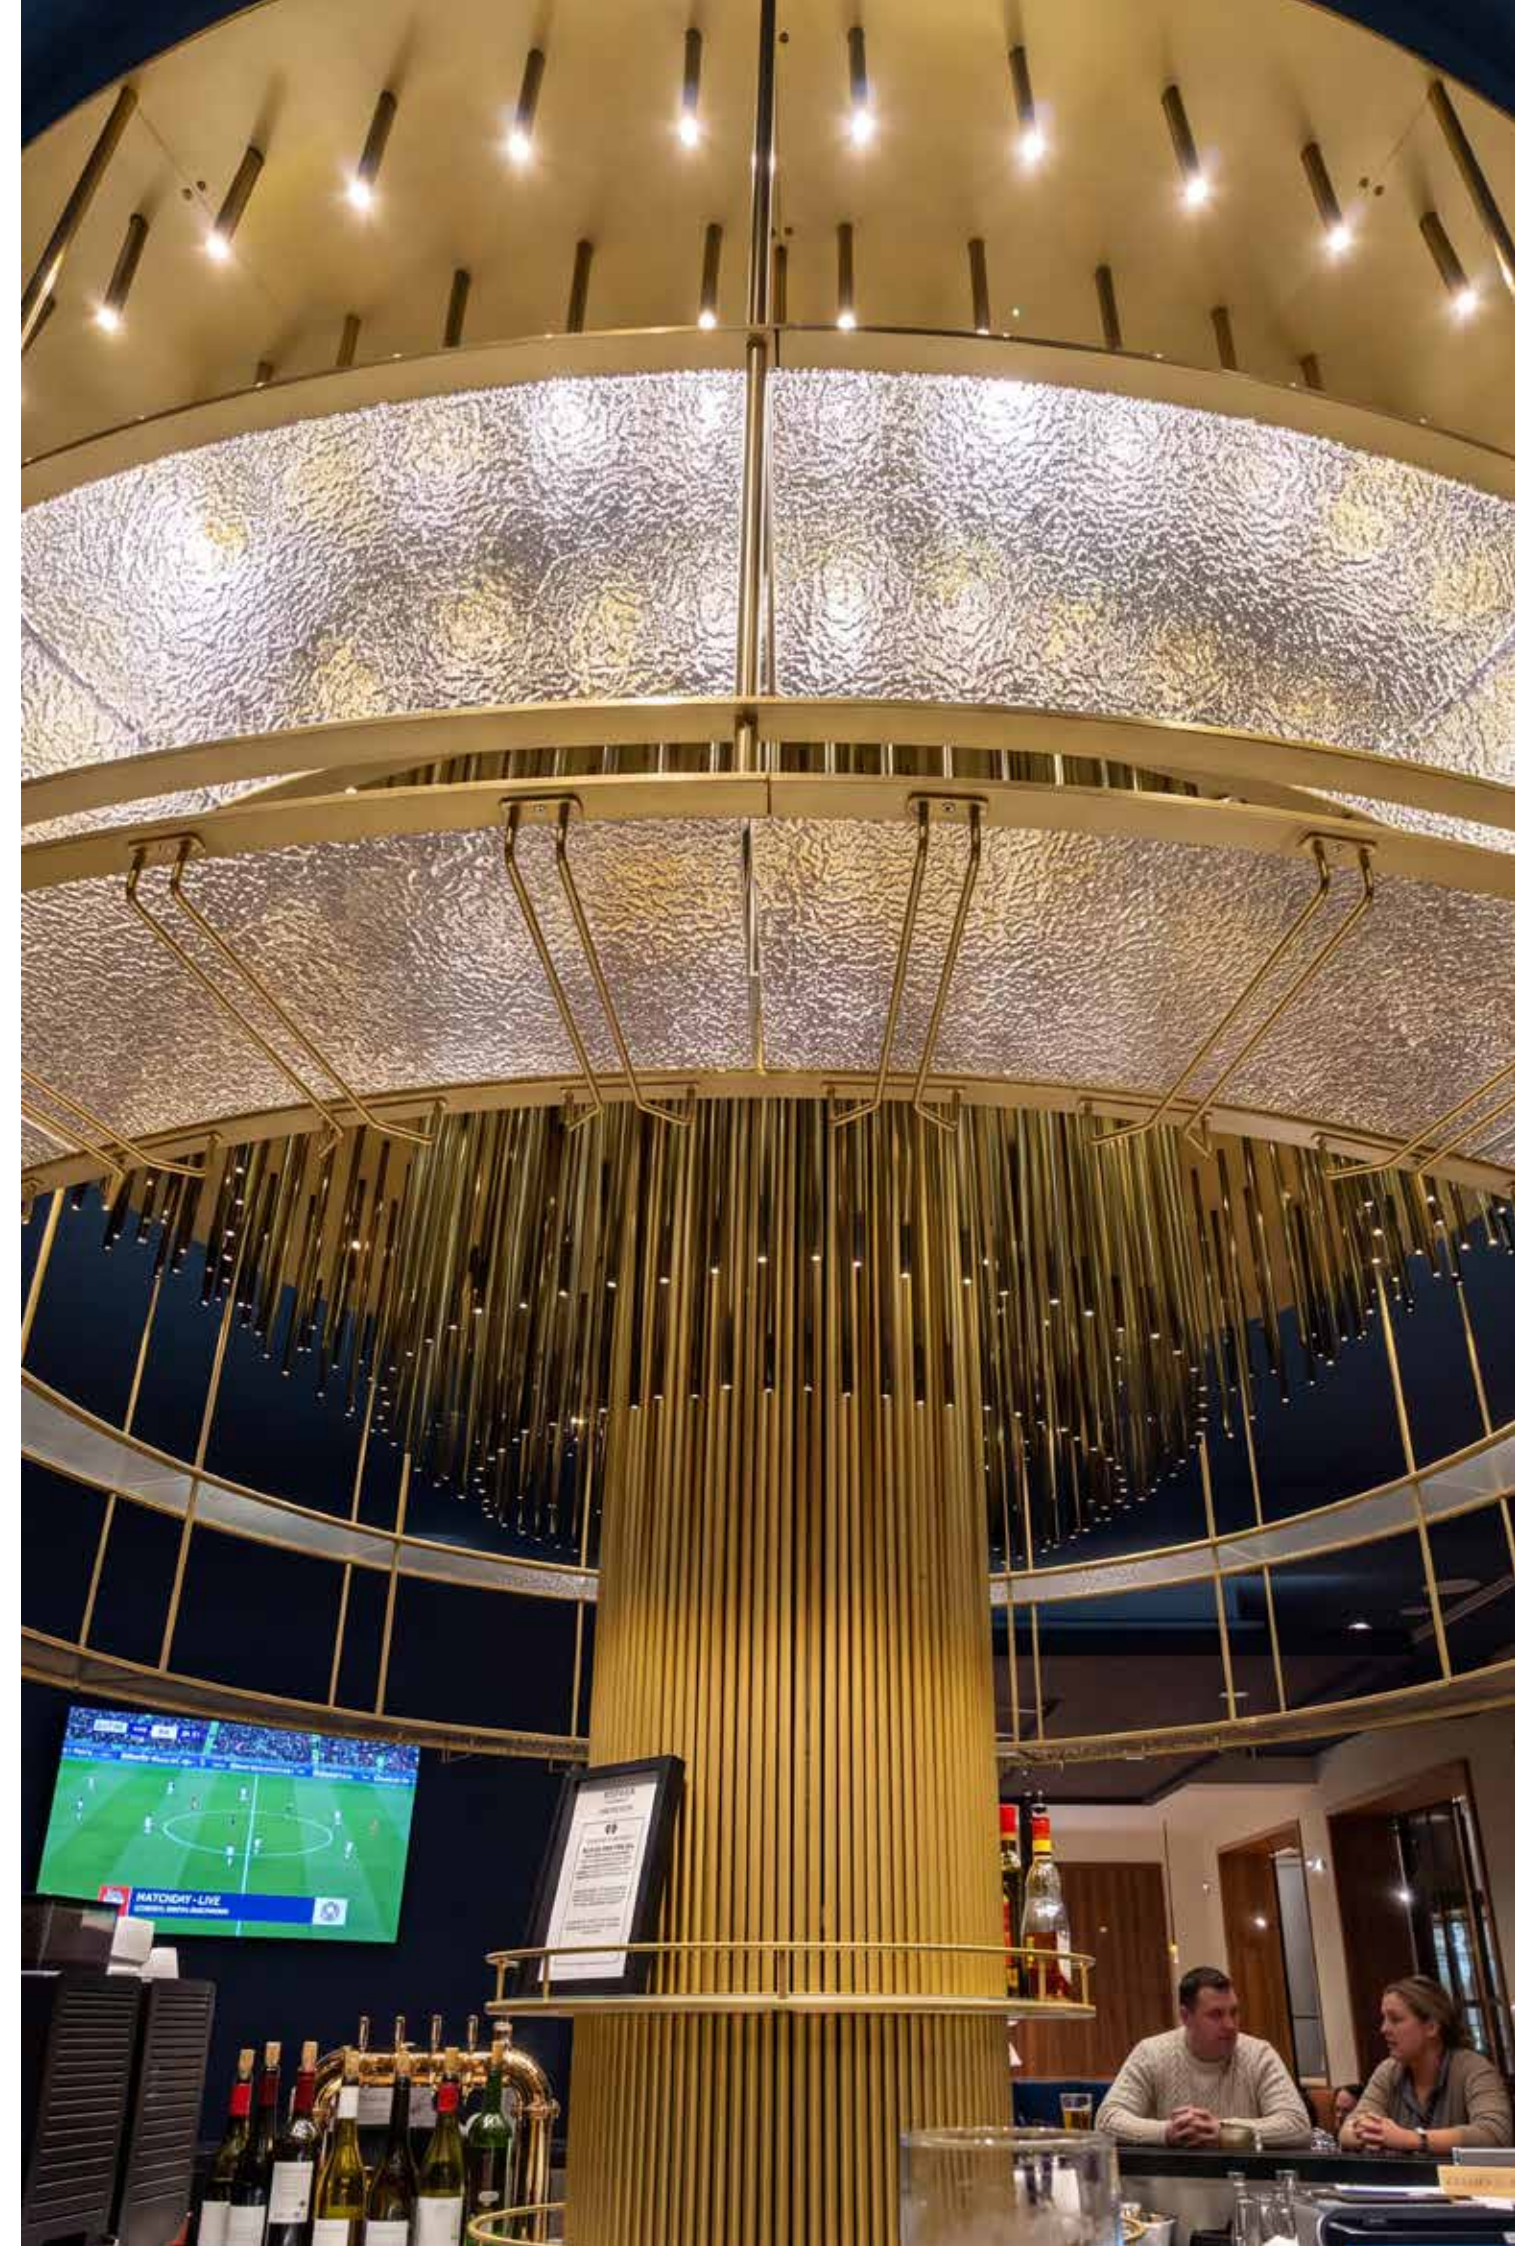

Example of installation in a hotel hall, chandelier 4 m long, polished stainless steel top bezel. The chandelier is suspended on an electric winch, which allows it to be easily raised and lowered by means of a remote control, thanks to which the art glass installation can be serviced and maintained quickly.

CROWNE PLAZA – PART OF THE GLOBAL IHG HOTELS & RESORTS FAMILY

Our studio is responsible for crafting the lobby features for Crowne Plaza Paris – Marne-la-Vallée, a 4-star hotel nestled in picturesque Magny-le-Hongre, just outside Paris.
